Building 198
Fort Monmouth, New Jersey

Att: (b)(6)

Dear (b)(6)

(b)(6) from the American Building Construction Company, your contractor on the NIKK Site, has been inquiring regarding electrical connections to the Earle Railroad signal system. The enclosed drawings are what we have available on the existing system. They are furnished for any reference that may be needed in the work of your contractor. When the contractor has finished with these drawings, it is requested that they be returned to this Depot.

Very truly yours,

(b)(6)
