ATTENTION: Dr.

1. The newly organized 
   Central Intelligence Agency is seriously interested in deter-
   mining the feasibility of using 
   specialized operational situations.

2. The use of 
   specialized operations seems prom-
   ising and deserves support. However, we feel that considerable 
   study is required to more accurately define the operational limi-
   tations inherent in the 
   close cooperation 
   with other departments having similar interests.

3. Recognizing that the 
   long and continuing interest in this area, we wish to explore with 
   you ways in which we could augment research; specifically, we would 
   like to undertake active collaboration with appropriate units of 
   the 
   to determine the feasibility of using 

/situations. Perhaps active collaboration 
would lead to a more rapid solution of the problems involved with 
minimum of duplication. I would welcome your comments on this 
matter.
