00B: (201045 JUL 90) The target vessel is presently (at time of detection) moving in a NW direction to a designated point in open water, where it will in some way (NFI) interact with drugs (suspected pick-up of drugs). There are presently no drugs on board. From this pick-up point, present plans are for it to proceed SW in an arc which will take it back to the mainland at a place SW of its present position. As it arcs around, it will engage in fishing activities. There is an indication that this ship has diving capabilities which are sometimes used for retrieving submerged or dropped drugs from the sea floor.

OOF: (201045 JUL 90) The target vessel is currently involved with legitimate fishing operations and is traveling in a northerly to northeasterly direction. The target is not presently not carrying contraband but has done so in the past. There was an illegal operation which was to occur but it did not gell due to a concern over the success of the operation. The captain/crew/owner are thinking about the legitimacy of this particular voyage and are feeling good about the overly successful [fishing] catch and that they can make some money without smuggling illegal material. The target has been associated in the past with a large sailing vessel with the term/name CAPE _____ somewhere on it. No transfer will occur. Additional information: names/terms/words associated with this target: Alonzo, Fredrico, Chaco, Paco, Arturo, Sympatico, Escuche'.
