1. (S/NF/SK) Tasking: Original tasking data sheet attached. Additional monitor guidance (per ops officer): explore the concept of vehicle "carrying" something.

2. (S/NF/SK) Session: No source PI. No source review of past session notes; source was informed that the session was to be a continuation of the "vehicle" target. Monitor informed source that he seemed (during earlier sessions) to be talking around the important aspect of the target. Session began in S6 with the cue "equipment"-following up on source's previous session. Later in the session, monitor directed source to turn his attention not to what the vehicle "systems" do, but to a description of all the significant items of equipment present on or in the vehicle when it deploys. Monitor feels that there is a moderate possibility that the source may have discovered the actual "target", i.e., the thing of interest to the ops officer/tasker.

3. (S/NF/SK) Summary: There is a piece of portable equipment that is removed and set up when the vehicle deploys to its location. This piece of equipment is tied into electronic systems aboard the vehicle. The device seems to be some sort of a detector/sensor.

4. (S/NF/SK) Feedback: Source was told that what he had perceived may be the target, but we would have to await ops officer feedback before proceeding further.
