live smooth, curving tapering reaching cover protect
 something inside it. "like" a shell over some important
 stuff inside. protect from elements but more important
 from observation. Impression, unconnected thin
 metallic shiny magenta-like network inside thin
 over-covering shell. Some of highly sophisticated.
 Technology highly involved & evolved. working toward
 effects -

4/2/3

"like" some connection of electro magnetic, but dealing
 with flow-through material setting up interactive
 fields. It's like there's three tubes that go
 in every which direction - though precisely arranged
 meaning to design, yet a very complex & convoluted
 design, which ~~uses~~ move a seemingly flowing
 but viscous & bio-inimical substance in a
 specific proximity pattern where it creates some
 sort of ~~non~~ non-contact, perhaps energetic
 interaction with other portions of the substance
 flowing at different angles to itself / "like"
 polarized movement. Produces peculiar field effects.
 Substance in tubes is sensibly "like" but thin
 Clean of wheat in consistency. Fields/energy/cognate
 effects thus produced be contained w/in shell, but can
 be extracted & moved to external location for use or
 applied solely w/in sheltering shell itself.

SUI

7/15 7

D & K (cont)

This Field whatever it is has proximate effect on other material. physical effect. through sealings microwaves on "substance" but very pervasive. Heat involved, but not required to be purposefully generated. Forces itself seem to generate heat in addition to other effects.

A/S / Bk remains one of description of parts of trans plant process

A2 Bk yule

Substance

Substance seems to be potentially carcinogenic - has something to do w/ exposure to oxygen & hydro-carbon-based material. Keep circulating.

effects(c)

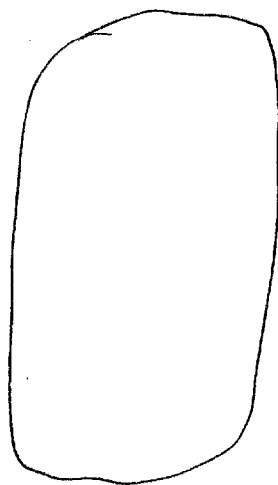

2412 whole purpose is not intended peacefully - has some sort of
conflict-useable result a effect - i.e. - "like" its intended
for a military application or something that would aid military
objectives.

242 things are brought into proximity + brought out again + may
be later distributed

Ad4/s "Like" things being in same way irradiated to draw
to highlight their own negative characteristics
"like" some sort of toxic agent is subjected to
ionizing effects, "mutating" effects so that they
are different in subtle ways from former effects,
and former defenses become ineffective against them.
