

8 Jan 91

Dr (Mr Berbuch)

when I received the target package, I thought it was the MARS material from [redacted] and began to tear open the outer envelope. However, I caught my error in time when I saw the attached target photo. I immediately taped the envelope at the tear and all along the flap areas that were not sealed well initially. I then placed this in a new envelope and secured it in my safe.

SG1J

I assure you, as stated on the 8 Jan 91 memo, that I did not open the envelope and do not know what is on the target photograph.

We need to agree on how to mark project material of this type to insure that only I get the material and to insure that no accidental opening occurs.
