

28 JANUARY 1987

DESCRIPTION OF PERSONNEL ASSOCIATED "ET" BASES

So far have run into three types of entities associated with bases at various locations within the solar system.

TITAN BASE..... all personnel observed at this base on 20 November 1986 appeared to be no different than native earthlings. There were two male technician-types sitting at a control panel of some kind. Behind them stood an attractive female with brown shoulder-length hair, wearing a pale green lab coat or smock. She appeared to be in some sort of supervisory role.

MT. HAYES..... there appeared to be two types of entities associated with this site. The two entities located outside of the structure were accomplishing some sort of routine task.... unable to make contact with them or gain information of any sort. Inside the structure were two entities.... one sitting at some sort of circular console with a round screen-like object. The other was busy doing something in the background. The entity at the console appeared to be human in form, but lacked definitive facial features. He seemed friendly enough and invited me to observe his actions at the console.

SOUTH AMERICA/AFRICA..... there appeared to be two types of entities associated with this site also. The first had a very large, round-shaped head on a slender neck.... very unhuman in appearance.... almost robot-like.... unable to make any contact with this being. The other entity was almost human-like in appearance. His face was devoid of any hair, his complexion was very pale.... facial features were very indistinct with the exception of a sharp, slender nose. This entity seemed friendly enough and appeared to
