SUBJECT: Comments made at 13 February 1979 Session of House Standing Intelligence Oversight Committee (U)

Robinson Q: What kind of preparation?

A: Relax, smoke, drink coffee - no hypnosis, etc.

Mineuta Q: Kirlian photographic techniques?

A: Aura resulting from ionization of Nitrogen - no known relationship to physic phenomena.

Rose For the record: I asked Stansfield Tunner what his agency was going to do with this and he replied that they planned to do nothing as they didn't know how to make it operable. His working level people stated that their superiors don't support using it because overhead photos give better resolution; but, how do they read contents of files and drawers?

Whiteurst Q: Can you crossmatch the output of several psychics?

A: Yes, and a better description usually results.

Whitehurst Q: What is the maximum amount of funds you have received in any one year.

A: \$150K, once with overlap \$200K, have a \$400K budget one-half supported by SRI overhead.

Rose Q: Any other contractors in the US working on?

A: Not that they know of.

? Q: Where do you get the other \$200K, Is it easy?

A: Doesn't come easy, now it is up to us to fish or cut bait, one psysicist is working at one-half pay because he believes that there is a future in this

Q: Any private funding for you.

A: \$55K at one time from McDonald of McDonald-Douglass on SALT.

Rose For the record: McDonald has talked to me on this and he is willing to testify to any congressional group any time in support of this.

Rose This is the first time that this has been presented to Congress.

Whitehurst Q: Are you familiar with the Edgar Cayce Foundation - what do you think of it? It is in my district.

A: Read the books, - generally limited to medical diagnosis, seems believable, know several who have visited there and believe it is real; however, don't really know how to top it for this.

Rose Q: What is the extent of CIA, DIA and NSA work in this area?

A: CIA sponsored originally - got out in 1974 due to fear of wrongly connecting it with other efforts. Now only have one contract with an academican-researcher looking at SRI protocol.

Whitehurst These are minuscule amounts.

Q: What would you do with \$5 million per year versus the \$200K you now get?

A: More subjects in parallel, more laboratories.

Q: Where does most of your dollars go?

A: Salaries.

We have scoped out a \$1 million per year program.

Rose Q: What is the Soviet effort in this area?

A: Little specifically known since 1967.

Little known about RV.

Most seems to be in mind control and telepathy.

Estimate (from DIA/CIA) is SU spends \$10-20 million per year.

Rose Q: You support 5 scientists and 2 researchers for \$400K - what is your level of support?

A: ZERO after 1 April (Aware of Army contracting effort).

Rose Q: What other organizations besides SRI are working on this?

A: Only maybe Dr. Jahn at Princeton (Hamilton answered).

SUBJECT: Comments made at 13 February 1979 Session of House Standing Intelligence Oversight Committee (U)

Boland Q: Out of the population, how many can do this?

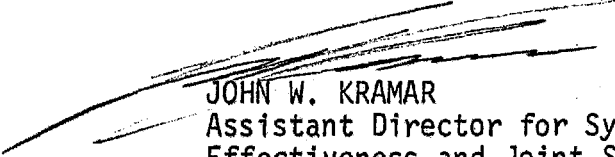

A: Out of 30 we tested, only a few couldn't

Rose: Q: Dr. Verona, how thoroughly have you checked them out?

A: We reviewed their credentials, reviewed their work and found no problems.

Writer: We independently tried their technique and got promising results totally independent of their efforts.

SRI's current funds are from Army Systems Analysis as opposed to intelligence as previously mentioned.

JOHN W. KRAMAR
Assistant Director for Systems
Effectiveness and Joint Service
Activities

P.S. Congressman Rose's comment to the writer after the session - three of these men are on the House Armed Service Appropriations Committee and you didn't have one dissenting vote.
