1. [redacted] The NSA COMSEC Doctrine and Threat Assessment Organization uses intelligence information from a wide variety of sources. This information is used to assess the foreign threat to U.S. communications security. To accurately assess this threat, we require information about certain foreign targets (e.g., foreign cryptanalytic organizations and activities)

however, we have been able to determine that some of the information is amazingly accurate, whereas some of the information is erroneous. At the present time, the greatest value of the CENTER LANE product is in developing requirements for other collection resources and to suggest alternative ways of interpreting information from other sources.
