

Project 80036
Session CD-42
100900 Jun 80

Remembering a previous session
same place he was the other day

multi gabled roof -
lot of long bldgs side by side attached
to each other

tower 200 yds away from this bldg

a. anything else?

metal junk laying around - parts of old
machines.

outside a fence - some kind of multi-
dish antennas across the road.

f. left - multi-roofed bldg.
to r. Storage parts / misc and
further to r. - bulk liquid storage
to ri slightly is tower

b. move over multi-roofed bldg
something like fire stops

c. what is ~~most important~~ ^{function} aspect of this whole
target area?

saw 2 more antennae

strong feeling of training

thruout!

d. saw data

This document is made available through the declassification efforts
and research of John Greenewald, Jr., creator of:

The Black Vault

The Black Vault is the largest online Freedom of Information Act (FOIA) document clearinghouse in the world. The research efforts here are responsible for the declassification of hundreds of thousands of pages released by the U.S. Government & Military.

feeling awareness
describe feeling / awareness
feeling of curiosity / excitement
young people there once
rather than working - curious and
excited - he thought that was
clearing

external steam pipes going into
this bldg and others

one (bldg) behind him on same
level as multi-roofed bldg
made of metal, one story,
3-4 times longer than wide

move into multi-roofed bldg to center
and describe to me.

big open shell - open bays
light from overhead - maybe
windows in roof
rows of steel posts support roof
all kinds of equipment in here
some is alike but most of it is
different

big fire brick pit thing 20/30' x 10/15'
Carts and overhead hoists
trucks and different vehicles

what is function of bldg itself

Somehow associated with training
several examples of different items

move to one end of bldg - describe

floor is wet

trucks sitting over there

like they washed down a couple
of vehicles.

looks like you can drive in
one side straight through and
out other side.

go to other end

Somekind of giant forge or some-
thing coal fired.

get feeling of heavy equipment
very open uninsulated

activity right now?

couple people - maybe security -
but he doesn't know security
of what.

move slowly out of bldg - maintain con-
tinuity - describe as you go.

break

Is this the multi-roofed bldg?

I guess

look for the metal bldg
where

you said it was behind
oh ya

Storage shed maintenance type bldg.

OK move inside and tell me what's
inside

big steel container bigger than a truck.

got big doors on it and its got "doors" on it like air tight or liquid tight.

goes up about 2/3ds to roof.
what is activity

nothing stirring
what is function
I dont know

move out side on to ground. you said it was familiar - do you still feel familiar

trucks are gone
cant find the new bldg
thought somekind of memory overlay but cant find the new bldg

look for new bldg.

wait a minute (cough)
I saw new bldg but tried to see where it was from bldg he went in white eye but lost it - try again

feeling more than one bldg with multi-gable.

apparently a few hundred yards to the SE of where he was. he sees fence & road.

now enter new bldg and describe

offices and laboratory type

shops - machinery

back outside

→ anything else in area you recognize

3 trucks - rest are gone - think it's same area

Old bldg has doors closed

old bldg -

same as other day
move right inside

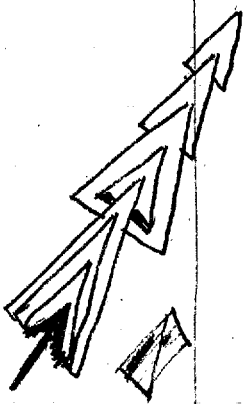

a lot like the other bldg - constructed a lot the same one or 2 each of quite a few things - brand spanking new. look like have not been field abused

what has not been field abused

like amphib vehicle

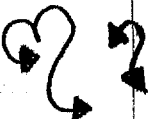

SP gun sitting over there
blust on it - sitting a long time

mobile AA gun w/ radar dish and small cables on top of it.

look through (while turn tape over)

→ when you're ready, tell me

large extremely heavy truck that doesn't look like a truck

cab over engine with very big wheels

some tanks - some with turret
off; some with tracks off,
one without engine.

How many tanks are there

they're not all alike - 5 to 8 -
not very neatly arranged -
all mixed up.

what going?

not pdw, suspect test/evaluated
research

what makes you say

production line has a particular
flavor but here diff. kinds
of pieces sitting around w/
components removed - does not
resemble methodology of a
production line.

new projects come in they
work on one with shortest
deadline.

what else in bldg.

Couple old towed 122 mm art's
pieces but had feeling they
werent interested in tubes so much
as whole gun like maybe a
modified test bed or something

what other equip?

I don't recognize all of it
Tracked rocket launcher with
some kind of funny racks
on its back.

Front end - looks more like
a truck than a track but
has open compartment on
its back with big racks.

What is presently the most important
aspect of the target today?

Looked all over - not much diff or
exciting - feeling the lack of
people important but maybe
~~the~~ I just ignored them.

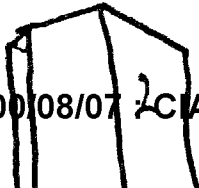

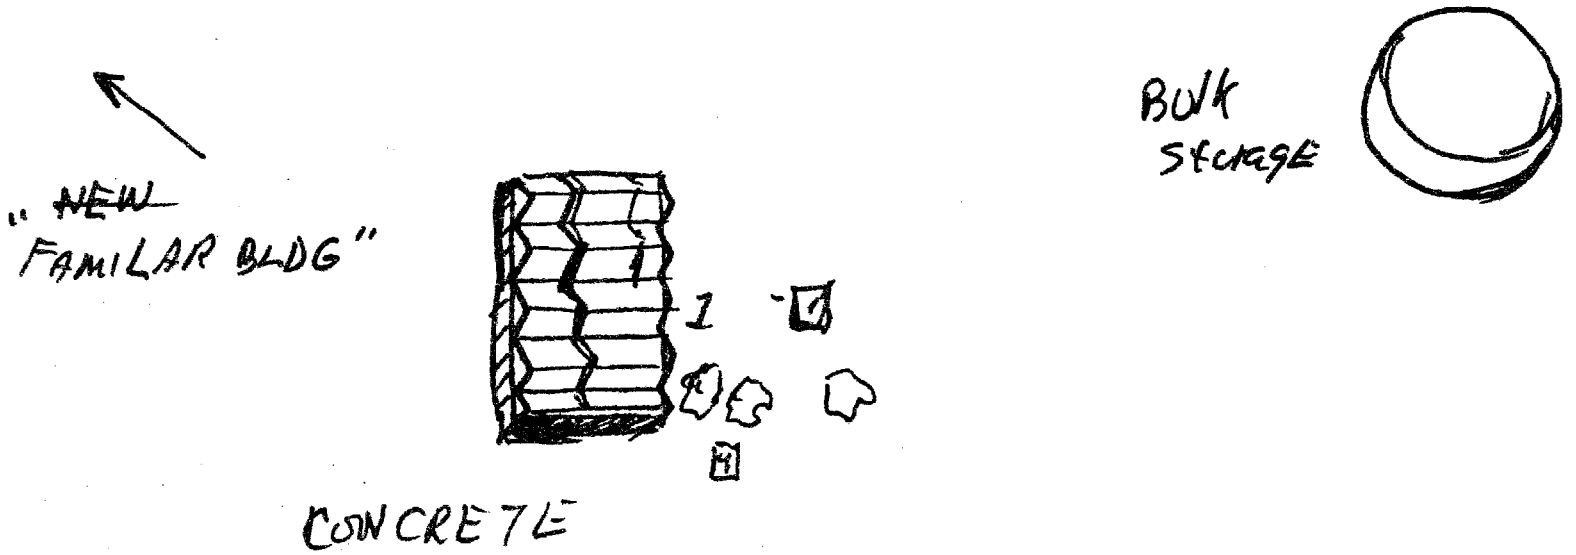

feeling something was "fired"
red flashing lights like several
danger areas, restricted access warning

nothing to add.

~~SECRET~~

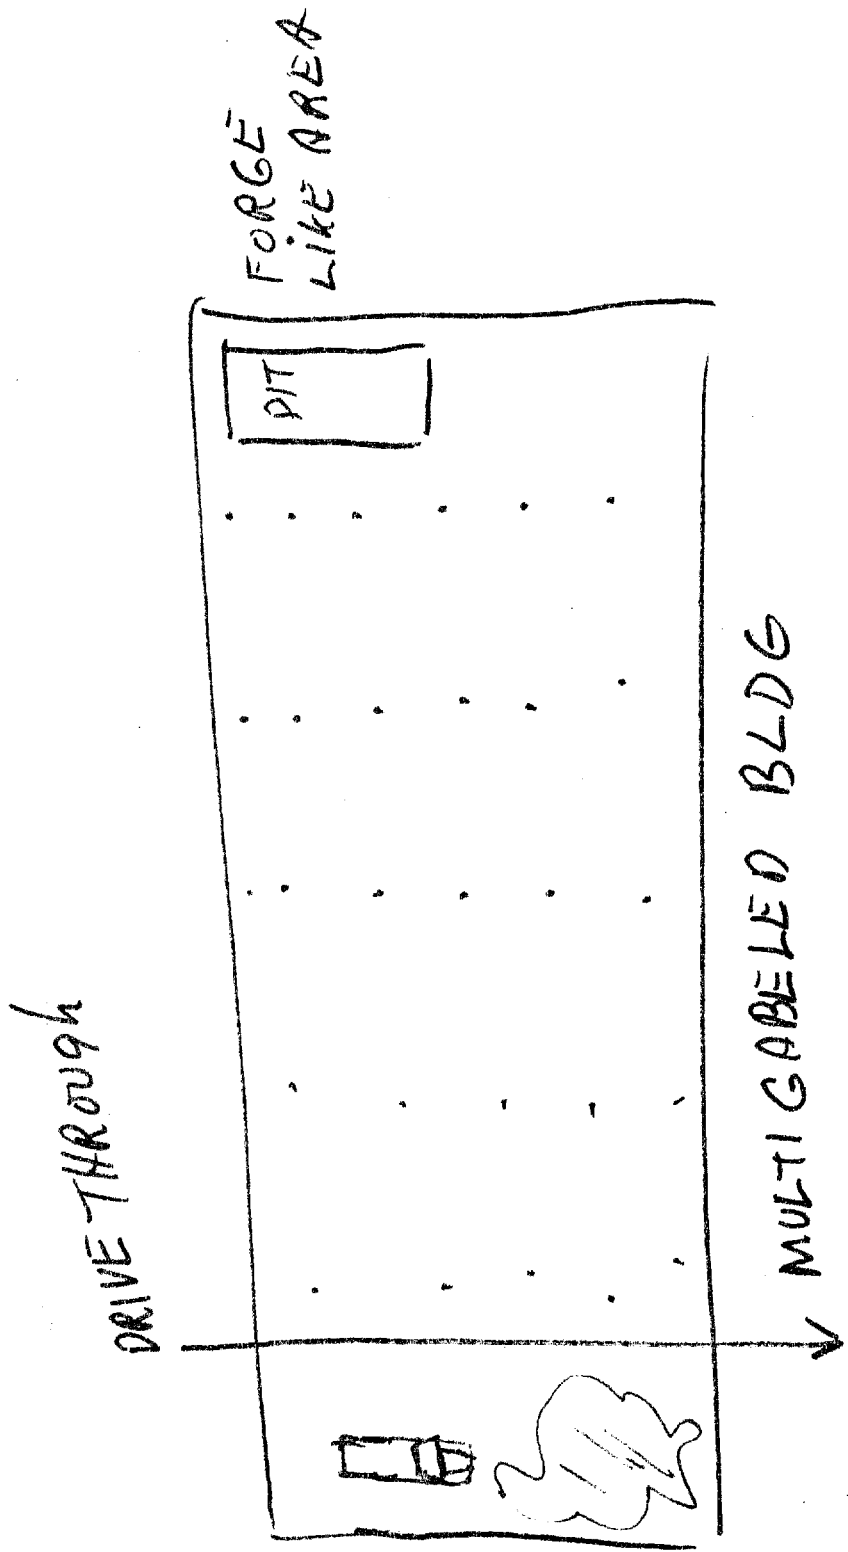

ROAD

BREAK IN DISTANCE

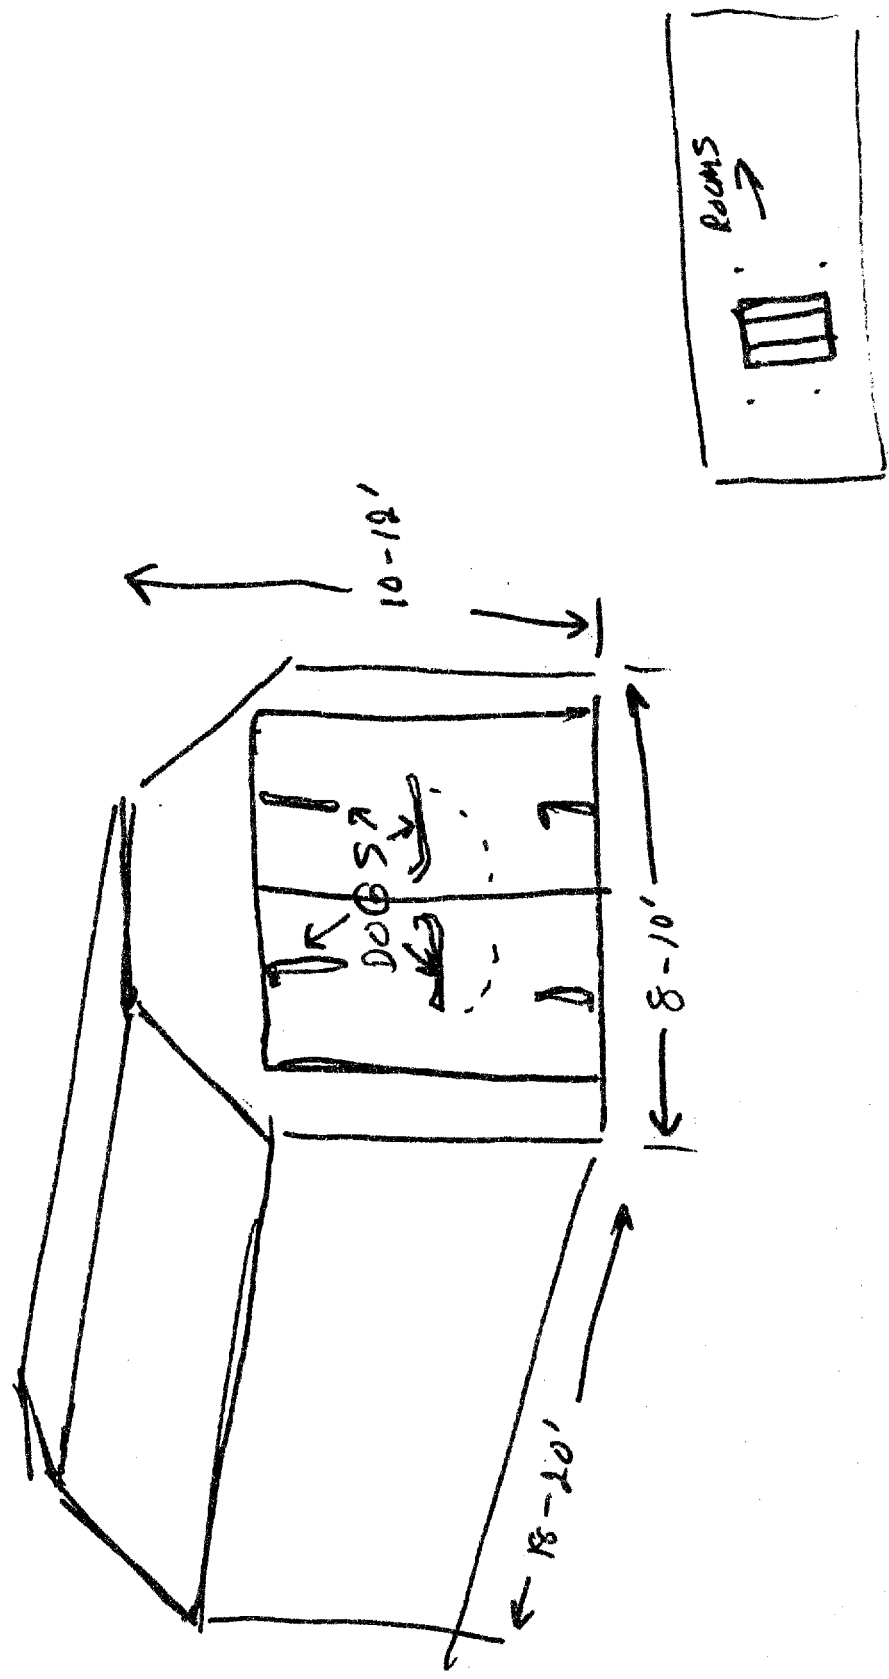

TOWER →
