SG1A

MEMORANDUM FOR THE RECORD

SG1A

SUBJECT: Unconfirmed Source Information, Pertaining to Actions Predicted [REDACTED]

SG1A

1. (U) The following information was provided:

a. (S) Source reported an excavation type of ditch, with a gravel flooring approximately 8-10 feet in depth and 20 feet in width in the vicinity of the above location.

b. (S) The wall of the excavation was described as having wood framing along the side. (Sources description does not indicate if this excavation is recent construction or a permanent feature at the location.)

c. (S) Source reported a tunnel like opening at the end of the excavation, with lights hanging from the ceiling. This tunnel opening appeared to go very far back from the opening as the lights were approximately 100 feet apart, and the grade appeared to be about 10% approaching the rear of the tunneled area.

d. (S) Source does not report any people other than an interior tunnel maintenance crew. He did state that he could hear a generator (large KW) start up in the back ground. Stated that it sounded very much like it was already running and had a load switched to it.

e. (S) Source did not state the origin of his information, but said that he felt there would be a demolition or deliberate destruction of the tunnel with explosives on or about 1000 hrs, 24 June 1980.

2. (S) When specifically questioned about the possible nature of event or level of activity which might or might not be planned for 1000 hours on the 24th of June 1980, He responded that he did not know of any event or activity which was supposed to occur other than what should be normal for that date and time.

3. (S) Request the above information be evaluated and comments be provided to the undersigned in writing no later than 19 June 1980, this will permit a full evaluation of the source of information for both accuracy and intelligence value. Information is pertinent to 1000 hours, 24 June 1980.
