Site is land/some structures interposed in a hilly area. Several structures. One is tall & angular; the others, a group, have a rounded component & involve some subterranean element. Surrounding land is relatively flat, w/ short grass, probably an encompassing fence. A very noticeable & unpleasant smell is associated w/ site. Site evinces a pronounced negative emotional feel - involving to some extent, fear, reluctance, sadness, loneliness, etc. feelings, apprehension, etc. People in some way involved w/ site presents site maintains a certain level of tension/ apprehension. At a certain point in the past an event occurred or situation existed that was of considerable greater magnitude of recognition & unpleasantness.
