Site is a ~~complex~~ facility consisting of a cluster of connected structures of differing heights, all of which are enclosed or surrounded by what may be a set, wall or fence combination. Structures ~~are~~ have "been there a while," but continue to serve a function. Constructed of concrete block, concrete, & metallic components. Structure is still being used, but concept of "abandoned" is associated with it in some way. "Isolated," & "functional," are also concepts associated w/ it. At some time in the past, site ~~also~~ manifested a sense of emotion, "resistance," or "rejection" of something. Unwillingness, confusion, & intertwined feelings of "dense" emotions seem also to be present in the past.
