Sit is hard/structures, interfoo. One structure is

fall, large, solid, ^{with a} sense of massiveness, imparting the feeling of being overwhelming. Noticeable (unpleasant) ^{Chemical} smells & taste; atmosphere seems dim, ~~dark~~ hazy. Another ~~one~~ involves a pronounced sense of roundness or curving around & also has noticeable industrial-like smells.

One structure is a building of numerous levels, at least one of which is filled w/ cubicles divided by a central corridor. Cubicles are small restrooms, access is controlled, & involve segregation, a sense of observing & being organized, & of development. People seem to be in the cubicles, & may have originally been there for other purposes but are being used because they're convenient there.
