First I went to a forested area with a kasene in it. Kasene was beside a road which ran through woods. Kasene consisted of several one story, freshly painted, light brown wooden buildings (barracks). There was a domed building (AOL like an observatory). They were 3 or 4 concrete igloos built into a hill. Place had a military feeling. Inside igloos 2 man rule was in effect. Troops wore grey uniforms, bloused boots and felt elite and cocky. They were looking something on to a cart. They felt anticipation and excitement.

Next I went to a place where workers were building a huge HOLE. HOLE was still raw earth. Moving into the future I saw concrete and iron frame work being constructed on sides and bottom of HOLE. Moving farther forward HOLE had been reinforced. Top was being built over. There was a huge device (see SKETCH) in bottom OF HOLE. DEVICE FAINTLY RESEMBLED A STICK OF CAYIFLOWER UPSIDE. WHEN I ASKED PURPOSE I GOT "REACTOR" BUT THAT MAY VERY WELL BE AOL. I ASKED FOR A PICTURE AND GOT A HUGE ASSEMBLY (see SKETCH)
