

Project CY 8609

Task

1. Describe the Technical Facility located near:

SG1A

2. Within the following ten year period determine if and when any "special events" occur:

\* Note: If you do find any "special events" - - - subsequent sessions will be focused on each separate "special event."

Site involves a facility with an overall purpose to produce something (not necessarily physical). A smaller structure w/in facility compound does produce something, perhaps hazardous. Activity/operation picked up at site ca. late '83, increased, then decreased. Last quarter 1984, then increased again & continues at high level. Idea that facility has been here along time but is how been "converted" or is host to a new sort of project than what it was originally intended for. may have to do w/ a stage (See p. 9) that does something, <sup>intends</sup> perhaps (involving high temperature) flux, or whatever. Sense of physical + information isolation, is like a S.A.P. here might be.
