types of weapons
utilization & targets

Main person is wearing civilian clothing.
 Briefing person is wearing military
 uniform and using an indicator
 to point to indicate location,
 etc. of weapon systems. Thus in
 room are mixture of military &
 civilian (military outnumbering)
 The person has more oval
 features than incidental.

I'm getting the impression that
 some of the ^{weapon systems} have been previously undetected
 and if discovered will
 create inter-national
 repercussions.

Building is located in a populated Cold War city.
 It is of newer construction than those around
 it, but not outstanding in appearance. It
 contains communication rooms, operations rooms
 with a lot of people, a closed (vault-type door)
 monitoring room and a room very much like
 a war room, which is being used for
 briefing. 10 men, mostly military are in
 this room. The main or most important
 person is wearing civilian clothing. He
 is being briefed by a man in a military
 uniform, who is using maps and ^{33mm.} slide
 projections to show location (geographical-
 Eastern Europe & Middle East) of weapon systems.

The room is circular. If one were in
 a round chair (which is being used

by the main man, he can do a 360° survey of
 the room. The room is dark + windowless.

~~Also essentially~~ The brief is showing where
 the weapon systems are located, utilization and
 possible targets/effects. There is great concern
 about previously undetected locations becoming
 known, which could have inter-national
 repercussions. There are SDI-type weapons.

4 locations E. Europe
 were concerned about the
 crisis in the Middle East.
 No known connection
 of support.
