PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8716	SESSION NUMBER: 02
DATE OF SESSION: 17 NOV 87	DATE OF REPORT: 17 NOV 87
START: 1017	END: 1115
METHODOLOGY: ERV	VIEWER IDENTIFIER: 018

1. (S/NF/SK) MISSION: Determine the presence of items of

SG1B

2. (S/NF/SK) VIEWER TASKING: From target area drawn and described in Drawing Number 1 of Session 01, access and describe the target structure.

3. (S/NF/SK) COMMENTS: Viewer perceptions were described in singleton expressions and words in an effort to deny 018 the opportunity to engage in extensive analytical comparisons and analytical overlay during the early stages of viewing. Viewer appears to have had a good, productive session. The methodology requiring Viewer 018 to express himself in singleton words or expressions will continue unless 018 objects to this procedure. Greater liberty of expression will be allowed when Viewer 018 reaches the latter portions of Stage 3 or finds himself within Stage 4 of a session.

SUBJECT: SESSION SUMMARY (C/SS)

SG1J TO: DT-S (ATTN: [REDACTED])

1. (S-SS) Statistics:	Viewer:	018
	Session date:	17 NOV 87
	Mode of operation:	ERV

2. (S-SS) The impressions of the session were very confusing, but did have a considerable amount of consistency. The overall impressions of the site were:

a. The site is a structure which appears to be red-roofed. It is very large inside, with what appears to be gigantic "things" sitting all around. The "things" are odd shaped, and seem to spill over into each other's areas.

b. There is the perception that actual work is going on, but there is a compression that the place gets a great amount of use as a showplace. The AOL of a "working exhibit" surfaced repeatedly.

c. Many people were perceived. Two main activities were going on: work and observation. Each worker or group of workers seemed to be involved in their own projects, rather than all workers in the place being somehow involved in the same project. The labor involved appeared to be manual labor, working with tools, rather than mental labor. There did, however, seem to be a few people wearing "smocks" rather than work clothes.

d. There was an impression that the entire large area is

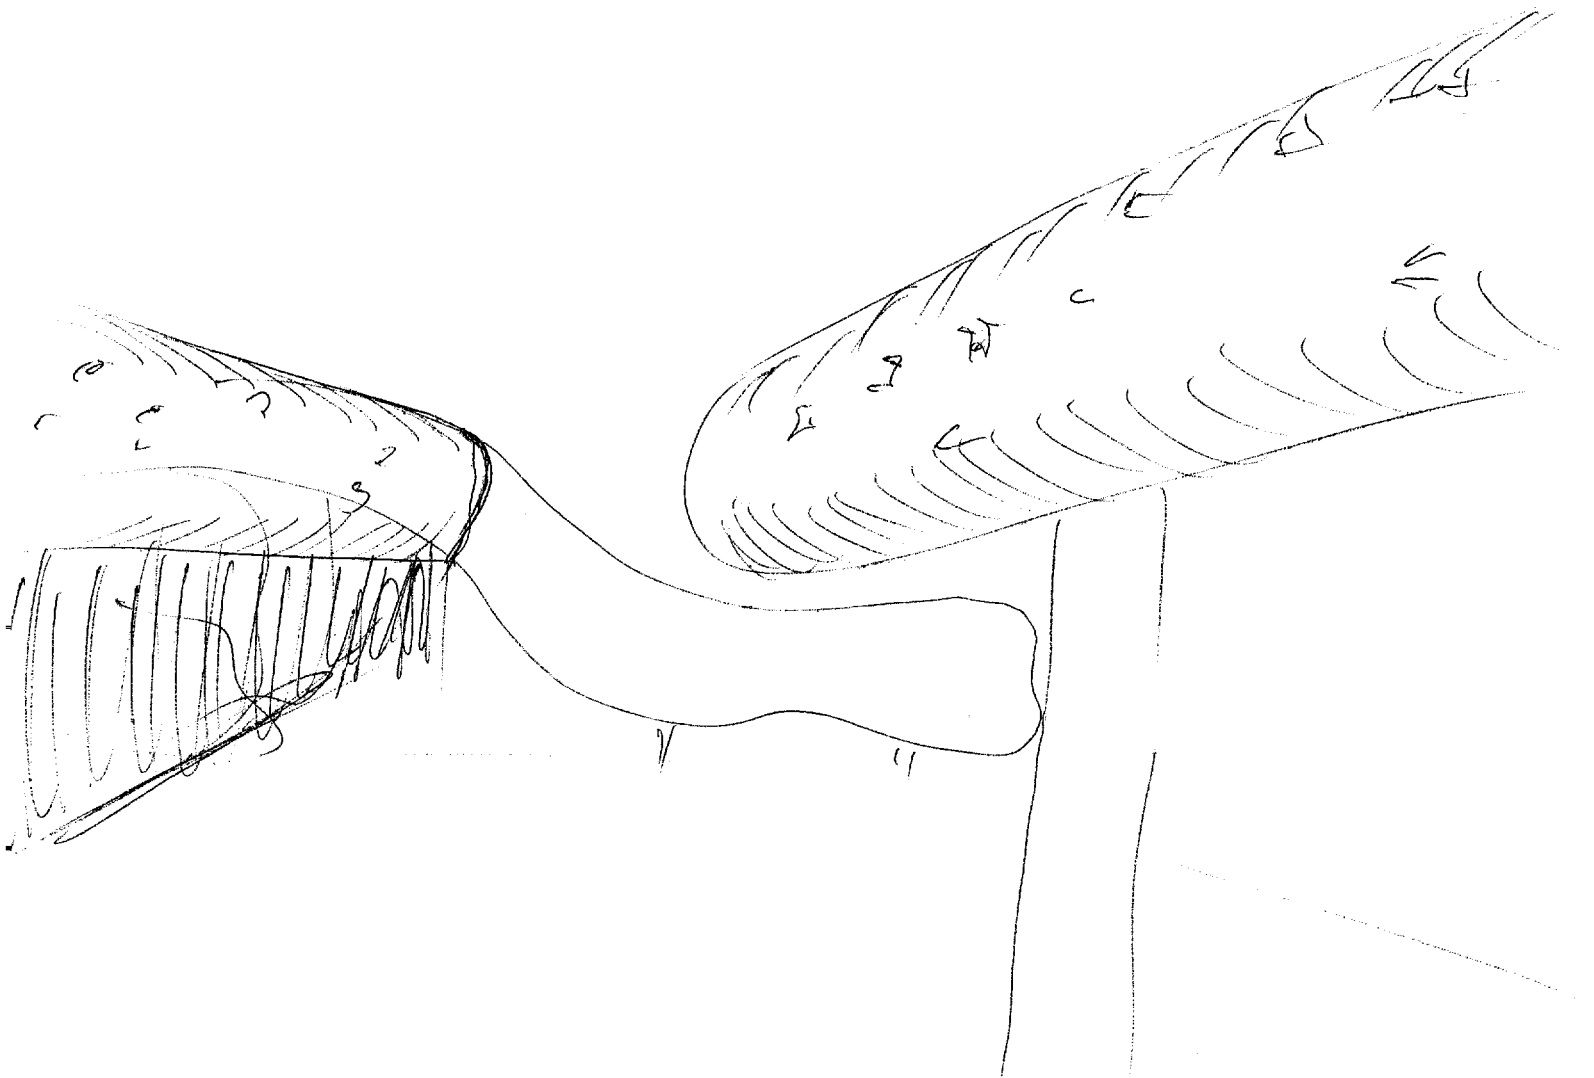

e. There was a brief set of impressions which involved people dropping round "things" into a small hole and receiving energy. This energy appeared to shine out toward them and strike them in the face.

f. There was also an impression that, although there was no requirement for someone to be young to work here, most of the people were young.

g. Asked about the relative importances of the place, I got the impressions that its social and political importance was actually greater than any importance it might have scientifically or industrially.
