Interim Summary

Site involves many, many diverse structures, most only marginally relevant to primary import of the site. One structure seems to have been detected of immense size + volume, the primary purpose which will culminate not long after the elapse of ^{year} ~~one~~ from present time. Structure seems to be intended somewhat as physical protection for its contents, but primarily as shield against observation. Something inside bldg. is intended to "reach out" beyond confines of the bldg + even the facility as a whole to perform tasks or purpose according to its "owners" specifications. Great distances remained from site in question. ("Almost as if it doesn't stay in structure, but moves out beyond it somehow"). Structures' roof may have a marked rounded component to its. Numerous dish-type antennas are associated w/ the site. Cylindrical dimension are involved with important objects at site. Within a (perhaps "the") structure is huge open vertical + horizontal space. Inside as well is/are structures of bipolar dimensions - one would expect to find a structure of this size outside, rather than w/in another structure. Inner structure is very complex in construction, w/ ~~many~~ many crisscrossing elements, cables, etc. + is made primarily of metal. Whole project seems to be built ~~on~~ ^{space-program} scale + portables of many similar elements - including machinery, equipment, techniques, technology, +

S4 1/2 Seems that this "system" or "object" ~~is~~ ^{may be} intended to be used for a specific purpose, i.e. "put into operation," but for some reason it's not

Strong ASL / ASL/s of space vehicle of someone,
impression, perhaps incomplete, that "system" is
ultimately not used, though it is intended to be.
