1. (S/NF/SK) Tasking: See attached data sheet. No other tasking data provided.

2. (S/NF/SK) Session: During S4, source was directed to use the tasker's mind as a reference point, i.e., to "take the tasker" into the target area so as to possibly assist the collection process, perhaps to "point out" things of significance that the source has not identified. Monitor felt that the source would do a fair job at sorting out the S4 overlay resulting from this move and was interested in determining its efficacy.

3. (S/NF/SK) Summary: A structure is located at this site within which is a large (AOL) "machine shop". A large, heavy, orange thing is here which reminded source of a (AOL) "tank turret". A small, "instrument-type" thing with a machined surface attracted the source's attention, (possible "doorknobbing"). This small item goes into the side of a very large, white thing. On/in the small thing are plug holes out of which come wires. A bluish wire and a green wire seem most important; a man is installing the thing and has difficulty with it. This item seems to serve the function of monitoring, metering and controlling the large thing into which it is inserted. (Session was terminated after source went into AOL drive of "missile").

4. (S/NF/SK) Feedback: Source was informed that this was the "first cut" of a new project.

SUMMARY: SITE IS (SEE P. 1). THE STRUCTURE AT THE SITE IS (SEE P. 7) AN "INSTRUMENT"-TYPE THING WHICH IS SMALL AND HAS A MACHINED SURFACE APPEARANCE SHOULD BE OF PRIME INTEREST TO THE TASKER. THIS SMALL THING GOES INTO AN OPENING IN THE SIDE OF A LAMINA (VOLT LAMIN) WHITE THING. IT IS CONNECTED BY POSSIBLY SEVERAL WIRES (THE SMALL THING HAS SEVERAL PLUG HOLDS ON IT), BUT 2 SEEM MOST IMPORTANT: A BLUE ONE AND A GREENISH ONE. THE MAN WHO CONNECTS THESE WIRES AND INSTALLS THE SMALL THING INTO THE SIDE OF THE LAMINA THING HAS TROUBLE BECAUSE OF THE AWKWARDNESS OF THE POSITIONING OF THE SMALL THING, AND BY THE FACT THAT THE GREENISH WIRE IS SO SHORT THAT IT MAKES INSTALLATION DIFFICULT. THE SMALL THING SEEMS TO BE FOR MONITORING, MOTORING, AND CONTROL OF THE LAMINATED THING. BECAUSE OF IS ANNOYED
