

PROJECT 8704

1ST TASKING

DESCRIBE THE PURPOSE OF  
THE AREA LOCATED AT

377566/752042

This document is made available through the declassification efforts  
and research of John Greenewald, Jr., creator of:

# The Black Vault

The Black Vault is the largest online Freedom of Information Act (FOIA)  
document clearinghouse in the world. The research efforts here are  
responsible for the declassification of hundreds of thousands of pages  
released by the U.S. Government & Military.

①

Area is gray overcast and gloomy. Site is a large building. There are many other large buildings around. The place where you enter building is darker than it is outside. Inside building it is quiet almost hushed. There is a man on the ground floor. He is oriental or mongolian. 45 to 55 5'6" 155 lbs - black hair. There is a large open room in building. Room is multi-purposed (NFI). In the room there are five men sitting in a row like on a stage. Each one gets up address a group and then sits down. It is almost

like a board of directors addressing the salesmen and tell them what the company has come up with and where it is going.

I look for a leader. One man on stage is very interesting. He is a J. He has his day planned down to 5 min intervals, However he does not break projects down into milestones. Every project has only 3 parts a beginning a middle and a conclusion. He is thinking about making allowances in a mechanical sense. He is thinking that making allowances is an other

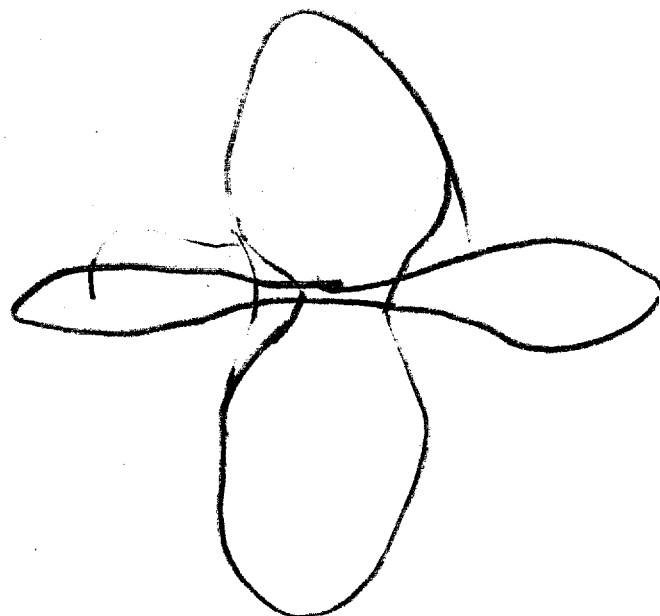

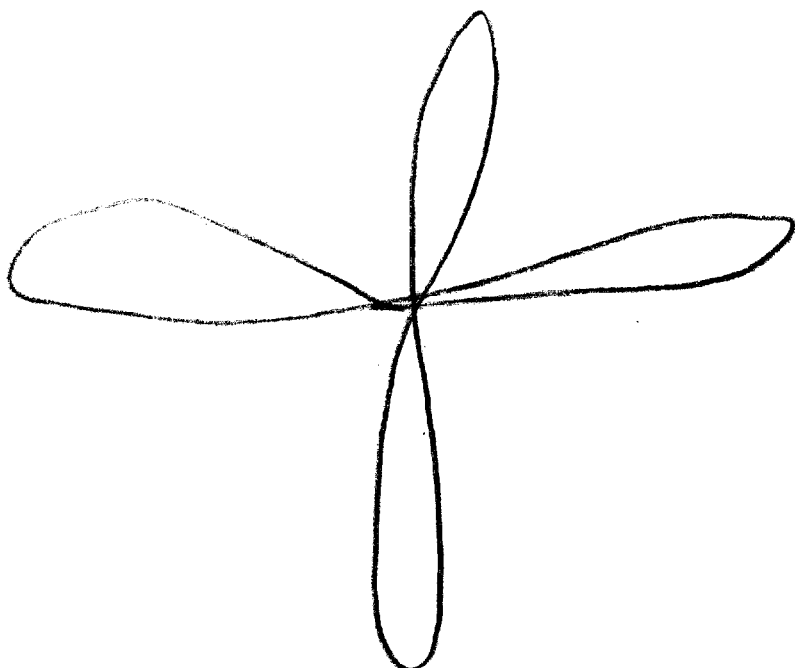

word for "Tolerances". He is also thinking about something that looks like a propeller see sketch.

This place is concerned with holding, safeguarding, constructing and components. Things are built of components to be put together at some future date.

This man who is thinking reminds me of Hal Puthoff in a way. He is also thinking of light weight metals and alloys.

I STILL HAVE  
THE ENVELOPE

propeller  
like thing  
in thought
