1. (S-SS) Statistics: Viewer: 018
Session date: 14 FEB 88
Mode of operation: SOLO

2. (S-SS) CUEING: "Produce a detailed, large area Stage 6 rendering of the site originally viewed on 02 DEC 87. Place structural elements in perspective.

3. (S-SS) SESSION CONDITIONS: PI: None AV: previous session

4. (S-SS) RESULTS: Only a partial session was held. This same tasking will be reworked in the near future.

a. AREA: The area appears to be a city near a land/water interface. The city seems to be full of trees, giving the appearance of a city and a forest in the same location. From above, it appears that the trees seem to cover the houses in many places.

b. STRUCTURE: There is an impression of an old garage in the city. It is dark and overgrown with vegetation. It is made of wood which is greyed with age. It is no longer in use.

NOTE: NOTE: NOTE: In preparing this report, I just realized that the site I reviewed for retasking was not the site assigned. I am not certain that this session was performed on the proper site.
