1. (S-SS) Statistics:	Viewer:	018
	Session date:	17 JUL 88
	Start time:	1310
	End time:	1410
	Mode of operation:	CRV
	PI:	None
	AV:	None

2. (S-SS) Cuing: 6 digit encrypted coordinates:

3. (S-SS) Tasking: None: general session.

4. (S-SS) Results:

a. The site area is flat, hard land which has a structure near a fall-off in elevation (see p. 4 of the transcript).

b. The structure has at least one tall, rounded portion (see sketches, page 2 and 4), but is generally squarish.

c. The interior of the structure has a general yellowish-cast to the lighting, and most of the "furnishings" appear to be square, flat-topped "things" of fairly even height (AOL: too square to be desks, but too solid to be tables).

d. A Stage 6 timeline (see page 5) which concentrated on the operational aspects of the target structure over a period of two years produced two specific points of interest:

1) The first comes approx. 1/6 of the way through the first year. It is a feeling of "shutting down", "losing it", "power failure", etc. These feelings were accompanied by a vague and moving memory visual of people standing around in the darkness at a field station when the power went out.

2) The second impression comes during the last half of the second year. There was a sudden feeling of

everything/everyone being "at odds" with each other. This included the feelings of "cross-purposes", "in-fighting", confusion, and contained a vague visual of fibers matting up in material which is beginning to fray (this had a strong allegorical feel to it).

1. (S/NF/SK) MISSION: Describe the personnel, equipment, and activities associated with the target structure [REDACTED]

SG1A

2. (S/NF/SK) VIEWER TASKING: Initial cue was coordinates. Since not a lot of activity was perceived at the target, a Stage 6 time line search was employed to view it in the future "at a time when it would be operational".

3. (S/NF/SK) COMMENTS: 018 seems to have a good "lock on the site, now. Subsequent sessions will be used to satisfy mission EEI.
