

SECRET/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

Viewer 099 Session Report
Date: 01 Sep 88
Time: 1235 - 1314

Summary: First perceptions were those of wavelike/cyclic motion (AOL-terrain following SLCM).

The perceived object is small enough to be carried by one person. It is low and flat, with one ridged or scalloped side edge and groves or channels on a (top) flat side. It possesses the quality of motion, like that of a A/S 'cam.'

A strong percept associated with the object is that of a 'part' for something (machine or 'system') which can run without it, but without which it cannot fulfill its ultimate purpose.

The object is associated with an AI of 'pleasing', "like" the pleasure I would derive through the use of such things as, for example, a high quality eyepiece on a moderate quality telescope, high grade recording tape in a regular tape deck, or hi-tech ammo in a weapon. A/S: film pack for a professional motion picture camera.

SECRET/NOFORN - SKEET CHANNELS ONLY
