SUMMARY OF INFORMATION

The target is in an isolated area with tall trees and mountains. There is an outside stone structure which is an old overpass (wall) by a river. It is constructed of rounded stones which create an archway. Hot steam and gray gravel sand is on top of a high mountain. Birds and wildlife are present. An underground cavern or cave can be found at this location. A structure (remnant) which rests to the right side of a cliff is composed of bridged arched openings in the shape of stalagpipes. Old engraved cryptic and transcribed stone writings, of a past culture, can be found at the site. See attached sketches.
