SUMMARY OF INFORMATION

Site is a group of 3-4 structures in a flat, urban area. The structures are about 20-30 feet apart and spacing is non-symmetrical. The area between the structures is flat and paved using a hard, brown/tan, stone-like material that is cut in large (several feet in each direction) rectangles. The entire site land area is covered with man-made materials of different types (asphalt, concrete etc.): there is no grass nearby.

The structures are of different design in both shape and size. One has strong curving elements: the sensation is one of down, around up and over. The area was quiet and the air smelled of smog/pollutants.

The cue "activity" evoked an image of a person walking up to a "walk up window" to conduct a transaction of some type.
