WORKING PAPER

1912-06 (W-12)
Project: 891213 (W-13)
Date: 06 DEC 89
Time: 1456-1552
Viewer: 018
Session: 01

SUMMARY OF INFORMATION:

1. Describe the target site: The site is a group of structures. I was drawn to one particular structure which was very large, round-topped, and had parallel lines (see Fig. 1), much like a metal building. Outside this building, there is a long, very flat and narrow paved area which ends bluntly in the vicinity of the building (see Fig. 2).

The building is very spacious inside. Lighting was from above, and was natural lighting, and quite bright. There appeared to be one upper-level vantage point from which one could look down on the entire open space and see people working on long, cylindrical, silvery-colored objects (see Fig. 3).

There was a mixture of perceptions, in that when I tried to look closely at the cylindrical objects, I began to see beds, tables, frilly curtains, etc. Backing off from these, I found myself inside a long, curved-topped smaller area which had an opening on one side. I took this place to be the inside of one of the cylindrical objects (see Fig. 4.). People were working in here, too.

2. Describe the activity taking place at the site: The people at the site appeared to be building or constructing the cylindrical objects and their interiors. Power tools were being used.

3. NOTE: Tasking sheet indicated tasking for W-13, but the tasking week is for the 12th target in this series. This was not discovered until after the session, so it will be interesting to see which week's target I actually worked.
