WORKING PAPER

Project: 891220 (W-14)
Date: 22 DEC 89
Time: 0734-1019
Viewer: 018
Session: 01

SUMMARY OF INFORMATION:

1. Describe the target site: The site is an area where a narrow, black paved area at one end of which is a structure. The structure is somewhat more "freeform" than normal, giving a slightly "askew" appearance to it. Its plain surfaces are very rough in texture, while more ornate surfaces are much smoother. Its main colors are pink (bldg's main color), grey (roof), and a yellow patch (below roof) (see sketch, figure 1). The interior lighting has a pale green tinge. The building looked very large inside, having a singular space (rather than small rooms). However, the outside of the structure made it look very small. The overall impression was that of a small building like the ones you would find at a children's playground, a miniature golf course, or at "Santa's Village" in a shopping mall.
2. Describe the activity taking place at the site: The people at the site were walking, looking at things, and listening to overhead music. They appeared to be walking in a reserved place for walking, making them appear more as a line of people than a crowd.
