PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: B914-I                      SESSION NUMBER: 01

DATE OF SESSION: 29 MAR 89                DATE OF REPORT: 29 MAR 89

START: 1030                                    END: 1110

METHODOLOGY: WRV                            VIEWER IDENTIFIER: 025

1. (S/NF/SK) MISSION: Access and describe the unique aspects of the site. Provide an overhead perspective of the target area. Address and describe the most unique function of the target site.

2. (S/NF/SK) VIEWER TASKING: Viewer 025 tasked with the requirements reflected in Para 1. Add that a search will be conducted as a last session in this project. *copy of overhead. photos not provided to the viewer.*

3. (S/NF/SK) COMMENTS: No inclemencies noted. In the next session, the issue of energy/motion, description of the energy, location of the energy/sounds will be addressed. The overhead perspective will be reviewed and refinements added IAW viewer findings.

4. (S/NF/SK): EVALUATION:

*3 - Correlation  
of overhead  
photos -*

890329  
V:025  
S: 01

SUMMARY OF INFORMATION

The target site is located in a predominantly land area described as an "undulating pine valley." The structures are comprised mainly of older, red buildings of simple architecture. Overhead perspectives that include the presence of a long, narrow building, a sort of passageway described as an "area of concentration" are attached as ENCLOSURES 1 thru 3.

The results of creative, S&T and R&D efforts are being applied in a multiplicity of military related applications in accordance with a determined plan of action.

"Loud incredible sounds and noises of various degrees can be heard and are associated with the target site." High degrees of energy and motion are associated with the site.

SUMMARY OF INFORMATION

The target site is located in an undulated valley which is predominantly a land area. There are simple buildings and energy motion present. See attached sketches. Loud sounds (noises) above, are here "under signals". A military intelligence mission includes a planned coarse of action involving R&D and S&T.

SUMMARY OF INFORMATION

Inside a long building at the targeted site, there is an apparatus which provides data and has computer characteristics. This is the principle area of concentration (see sketches). The apparatus scopes out, receives and deciphers, unknown air (elevated) activities such as; planes and other aircraft. It is similar to a kaleidoscope and is not radar related. However, this apparatus could "cramp" air vehicles because it releases a great amount of "motion energy". It can be directed against the stealth bomber's effectiveness by neutralizing it.

Handwritten notes on the right margin, including a vertical line and some illegible scribbles.

Handwritten mark at the bottom right corner, resembling a stylized 'U' or a similar symbol.

concentration pt - Long build

- Place of principle interest
- Decisions are carried out at long build
- Planned (?) — go over →
- R & D dependent work & organization
- always planning
- has sub cell rooms

~~Reported to~~ Different alignment nearby

Instrument (in Long Building)

- is in Long building
- columns
- chamber
- concentration
- Day presence of bay
- western hillside responsibility

- + provide data
- + help us in understand
- + valuable & precise
- + watching from above

(WORD like a bomb)

INSTRUMENT

- illuminates
- covers land

... it is correct.

(2)

- Scapes out
- Reviews and recaptures unknown air elevated activities
- Processed normally (common name)

### + Klaidscupe

- looks at something
- Changes activity
- involves computer-based activity
- Timing is a factor - & helps in decision
- Aircraft
- dual action
- not radar related
- ~~Appetite~~

3

- instrument could drop
- 7 NS fragment of steel.  
(inside the structure)
- witnesses
- tracks
- instrument today - 200.
- instrument releases great  
massive  
amount of "motion energy"

Instrument used  
not today -
