WORKING PAPER

PROJ: 8915
VIEWER: 095
DATE: 12 MAY 89
SESSION: 2

SUMMARY OF INFORMATION

The site is a series of structures in a foreign country. The site is a small military compound of less than 2000 people. Uniforms are very dark in color. There is a large several story building with some offices in it. In front of this building are a cluster of mobile military weapon structures. These are black and have an unusual dimensionality to them--lots of non-90 degree angles. These weapon "structures" are identical and are the only type of weapon besides small arms in this compound. These mobile weapon "structures" are ^{not} past the R&D and experimental stages but are not deployed "out front" to use a US analogy it is as if these weapons are in a small base in Kansas but not in Germany or Korea. A sketch of the area is shown. ^(p.8) The area where the compound is, is leveled off --flat and brown. Nearby the landscape is steep. Somewhere in the area is a flat, paved off area like a tarmac/ (S-7)"tamarack." The air is cold.
