PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8819 SESSION NUMBER: 1
DATE OF SESSION: 31 OCT 88 DATE OF REPORT: 1 NOV 88
START: 1318 END: 1423
METHODOLOGY: SOLO VIEWER IDENTIFIER: 018

1. (S/NF/SK) MISSION: For this initial session, the objective was for the viewer to acquire, describe and conduct a brief exploration of the target area, (depicted in an overhead photo).
2. (S/NF/SK) VIEWER TASKING: Coordinates only.
3. (S/NF/SK) COMMENTS: Fair probability that 018 achieved site contact, (after a tremendous battle with AOLs!), but subsequent monitored session will start from Stage 1--just to make certain.
4. (S/NF/SK) EVALUATION: []

3. (S/NF/SK) Results:

a. The target is structures in an area which is dry, somewhat flat country. There is a surprising amount of vegetation present for this climate, and the vegetation which was there appeared to be planted and tended rather than wild.

b. The structures are large and squarish, with what appears to be rounded edges. There are several of them which are similar in appearance.

c. The interior of one of the structures is quite spacious, but well taken up by some pieces of very massive machinery. The machinery is stationary within the structure, but has slow, rhythmic movement in-place of large, massive portions of the machinery. Much of this movement takes place overhead. Most of the machinery is of a dull, light reddish color. The machinery is surprisingly quiet for its size.

d. Stage 6 work revealed that this place (which looked like a foundry or factory) is used for both manufacturing and research, with a little more emphasis on the research (see second scale line, page 10A), and that the products are of a
