PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER:	8904	SESSION NUMBER:	01
DATE OF SESSION:	06 FEB 89	DATE OF REPORT:	06 FEB 89
START:	1034	END:	1140
METHODOLOGY:	CRV	VIEWER ID:	032

1. (S/NF/SK) MISSION: To access and describe a target structure shown in overhead photo imagery.

2. (S/NF/SK) VIEWER TASKING: "Access and describe the target site at encrypted coordinates: 428013/839461."

3. (S/NF/SK) COMMENTS:

a. Inclemencies: Fatgiue and cough.

b. 032 first accessed the interior of the structure, then was taken back outside. First site contact appeared to be solidly in touch with the proper structure, so the session was continued. There was a strong tendency on 032's part to drift to the same apparent site as 011 had in the session just before this one. Apparent ADL took over, and the session was finally ended with the question of the event. Due to time constraints with this target, a proper search was not conducted at this time.

c. Summary of Information enclosed.

4. EVALUATION:

SESSION SUMMARY

VIEWER #: 032
DATE: 6 FEB 89
START TIME: 1034L
END TIME: 1140L

Site is a structure. The structure is made up of a central building which is large and hollow (AOL like a hangar or warehouse). This central structure (several stories high) is surrounded by other smaller structures (one or two stories high) -- some of which are attached to the larger one while others are spread out away from the main structure. The main structure is constructed of thin metal over a metal frame -- some of the roof is corrugated and there are large openings at both ends of the structure. The exact dimensions of these openings are unknown but they are much wider and taller than a standard door. All of the smaller structures possess standard size openings for doors and windows.

In the general vicinity of the structure there appear to be several different antennas of different style e.g., tower, dish, and cone (see pages 10 and 11). The purpose and function of these is unknown from outward perceptions -- there is however, a strong feeling that inside the building there are persons responsible for monitoring, watching, and listening to information available outside the confines of the building, (AOL radio signal interception).

Inside the main structure there are high pressure lines, cylinders, tubes, pipes, panels, chairs and desks. There is a presence of high voltage electric power and also high pressure gasses. People with headphones on sit and communicate with each other while a process of assembly and testing takes place in the main structure.

The activity in the main structure is associated with assembly, production, putting together, building, development, study and construction of something experimental. The end result of this product is something dangerous, hazardous (AOL chemical or biological). Much of the activity centers around the packaging for delivery of the product. There is a strong presence of the perceptions of mechanical employment or delivery. There is somewhat of a laboratory atmosphere.

In some of the outlying offices (inside the smaller structures) there is great deal of planning and discussion ongoing. Some of the perceptions present at these meetings are discussions of funding, strategy, and methodology for employment.

Personnel at the main structure often wear masks with filters and protective suits.

The key event associated with the structure seems to be in the future -- and appears to be related to the destruction via some kind of "attack" on a government target of national value.

WORKING PAPER

6 FEB 89

TASKER

1. Encrypted Coordinates: 428013/839461.
2. Tasking: Access and describe the target site at the above coordinates.
3. Required EEI:
 - a. Describe the target structure at the site providing sketches of all physical perceptions.
 - b. Describe the contents of the target structure.
 - c. Describe the key purpose.
 - d. Describe any key activities supporting this purpose.
 - e. Describe the key event associated with the target (i.e. the key event of particular interest to the tasker). Remain open to the possibilities of this key event being in past, present, or future time, and also to the possibility that the event did not/is not/will not occur.
 - f. Through your own search technique, provide a set of map coordinates for the target site. Also note method used, and any perceptions gained.
