WORKING PAPER

Project: 8927  
Date: 890908  
Viewer: 018  
Session: 02

SUMMARY OF INFORMATION:

1. (S/NF/SK) Describe the activity of intelligence interest: The activity consisted of two groups of people:

a. There was a group of two or more people who were working their way down through a hole into a large room below. This gave the analytical impression of a "break-in", mainly due to the rough size and shape of the hole (see sketch, page 1), but there were no definite in-session impressions to support this.

b. The activity in the room below consisted of a truck backing down an inclined ramp outside a wide door leading from the room to the outside world. There were several armed and uniformed guards around the door, and a man (not uniformed and not a guard) was proceeding toward the door from between orderly arrangements of "objects" inside the room (see sketches, pages 2 & 4). Again seeking to identify the specific "activity" of the place, there were definite impressions of "pick-up" and "delivery".

2. (S/NF/SK) Near the end of the session, I got the impression that the "objects" were somehow drug related, and this concept began to color all other impressions, so further work was postponed until another session.
