WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 9007-II	SESSION NUMBER: 12
DATE OF SESSION: 21 Mar 90	DATE OF REPORT: 27 Mar 90
START: 0902	END: 0933
METHODOLOGY: solo	VIEWER IDENTIFIER: 018

SG1A

1. (S/STD) MISSION: Provide information on narcotics-smuggling operation involving a series of callsigns.
2. (S/STD) VIEWER TASKING: Encrypted coordinates plus listed callsign [REDACTED] (See attached tasking sheet)
3. (S/STD) COMMENTS: No Physical Inclemencies.
4. (S/STD) EVALUATION: Since no "ground truth" operational data is known for comparison, no objective evaluation can be made of viewer 018's results. Information provided is within realm of possibility given the overall context of Project 9007. Details are consistent with adequate signal contact. Confidence estimate: 55%
5. (S/STD) SEARCH EVALUATION: Location provided off coast of Mexico seems more plausible than the Atlantic location.

TASKER

1. PROJECT: 9007-II.
 2. ENCRYPTED COORDINATES: 220493/579178.
 3. BACKGROUND: See vessel call-signs provided with EEI below.
 4. ESSENTIAL ELEMENTS OF INFORMATION: Determine the following for each "call sign" listed below.
 - a. Provide the true name of the person associated with the call sign. In lieu thereof, provide phonetics of the true name.
 - b. Describe the vessel associated with the call sign.
 - c. Determine the current location of the vessel associated with the call sign.
 - d. Determine the destination(s) of the illegal drugs.
 - e. Determine the nature of the illegal drugs.
- (14)
THE CALL SIGNS ARE AS FOLLOWS:

WORKING PAPER

Project: 9007-II
Date: 900321
Time: 0902-0933
Viewer: 018
Session: 02

SUMMARY OF INFORMATION:

1. (S/STD) Provide the true name of the person associated with the call

SG1A

sign [REDACTED] Again, this question has no exact meaning, and therefore does not produce an exact answer. There was an impression that a "main person" involved had the name (phonetics only: "Enrique", "Ricky", "Reeky", "Rique", "Un Rique").

2. (S/STD) Describe the vessel associated with the callsign

SG1A

[REDACTED] The vessel is very large. The front of the ship appears to have a light blue band around the top with blue-green under it. The rear of the ship (see Fig. 1) appears to have a pile of loosely stacked black "things" on deck immediately in front of some very sturdy uprights.

3. (S/STD) Determine the current location of the vessel: (Time: 0920 hrs local, 21 MAR 90) Repeated attempts to locate the vessel produced no results. The ship, however, is "at sea" and underway.

4. (S/STD) Determine the destination(s) of the illegal drugs: Two impressions of destinations (both of which were in open water) were:

- a. Approx 100 miles north of Atol Das Rocas (Brazil), in the Atlantic
- b. Approx 100 miles west of Islas Revillagigedo (Mexico), in the

Pacific.

5. (S/STD) Determine the nature of the illegal drugs: The drugs located consist of a slab or very large, thin package of a cream-colored, pliable solid which has black streaks or marks on its surface. This "slab" of drugs is held to the wall by a yellowish rubber/plastic "cover" which buttons to the wall with large metal snaps. This is located next to a window, or some very bright, glaring, vertical light source.
