SUMMARY OF INFORMATION

Target is a rotating object of some form of metal. The metal inherent to this object is energy absorbent. It fuels itself by absorbing surrounding energies and processing them for power. This object is unmanned -- there is no life associated with it.

This object is either in the orbit of Earth or is destined for the orbit of Earth (undetermined). The object is of large proportion, relative to the height of man. A close inspection of the object revealed only its simple structure See sketch #3. I could not find anything else of significance.

*as noted  
40 times*
