SUMMARY OF INFORMATION

The target is a building located near other structures. The structure itself is square looking and appears to have a flat roofline. The interior of the structure has several different rooms some of which are austere office space and others of which are some sort of machine shops.

The shops have large working tables in them, with screens and vent like materials scattered around. There are frame like devices that have mesh metals spanning between the frames. There are tools used for the manufacturing and shaping of different items. These tools make the place somewhat self sufficient.

I did not see any people inside the structure. The purpose of the structure appears to be for some sort of medium grade manufacturing of metal and plastic products.
