PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8928 SESSION NUMBER: 03
DATE OF SESSION: 21 SEP 89 DATE OF REPORT: 21 SEP 89
START: 0936 END: 1000
METHODOLOGY: SOLO VIEWER IDENTIFIER: 095

1. (S/NF/SK) MISSION: Determine and describe the key activity at a geographical location represented by the Encrypted Coordinates 362104/453869.

2. (S/NF/SK) VIEWER TASKING: Remote Viewer 095 tasked with requirements outlined in Para 1, above. Session 03 was conducted at 95's request for an opportunity to refine data previously obtained.

3. (S/NF/SK) COMMENTS: No inclemencies noted. A Summary of Information is attached to this report. Session 04 will be conducted to pursue the configuration and purpose of the smooth tunnels. A fifth session with a broader focus may be conducted to determine the layout of the pipe (ADL nuclear site) from an overhead perspective.

4. (S/NF/SK): EVALUATION:

SUMMARY OF INFORMATION

Site has underground "tunnels" which have a mainly vertical component. Two are at the angles shown in the attached sketch. The tunnels are long, lined, smooth and polished. They are surrounded by a rock-hard substance "like" cement. It as if they are imbedded. The tunnels are round and smooth and made out of smooth, long, sections. The seams between the sections are so smooth as to be indistinguishable. The motion is in the tunnels and outward (toward the surface). The motion is confined and directed by the layout of the tunnels. I was not able to determine whether it was an object which was moving. The predominant sense is of the motion itself, ie. the pressure changes and 'noise' (impact on eardrums) as 'it' passes by.
