WORKING PAPER

Project: 90104-D
Date: 24 OCT 90
Time: 0845-0951
Viewer: 052
Session: 01

SUMMARY OF INFORMATION:

Short range ballistic missiles will be used against US and coalition forces in Saudi Arabia. The first time they are used will be approximately toward the end of the first week in November 1990 at night, through to January 1991. They will be launched from 31 05 N / 47 20 E, between the towns of Al 'Azair and Al Qurna, to 27 30 N / 45 40 E in Saudi Arabia.

When first given the coordinates, I could see a narrow, pointed object that is very sharp at the end. It is a rounded, tube like object and gets wider at the bottom, with fin-like objects on each side. It is bright and seems to be taking off up into the air. It is moving very fast. While it is moving upward, it is turning in a clockwise direction, almost spinning. It is very loud in this area. Noise seems to be everywhere. It is not one single sound, there are many sounds, all over. There is a rustling sound, a shaking sound, and a very loud, constant, unidentifiable sound. At first I saw a few people walking

in what looked like sand, moving very slow, then I saw many people running and loud, contributing to the noise. The entire area is dark, the only bright thing is the tube like object in the air. I can see flashes of light. First it's dark, then a flash moves from left to right, lighting up the area, then it is dark again. The flashes first make straight lines across the area, then rounded balls of light. The darkness is very heavy. It feels like I have a heavy weight on my body and I can't move. It is almost like there is smoke all around me. I only saw the one tube like object taking off into the air, but later I could see five or six of them lined up in a row.

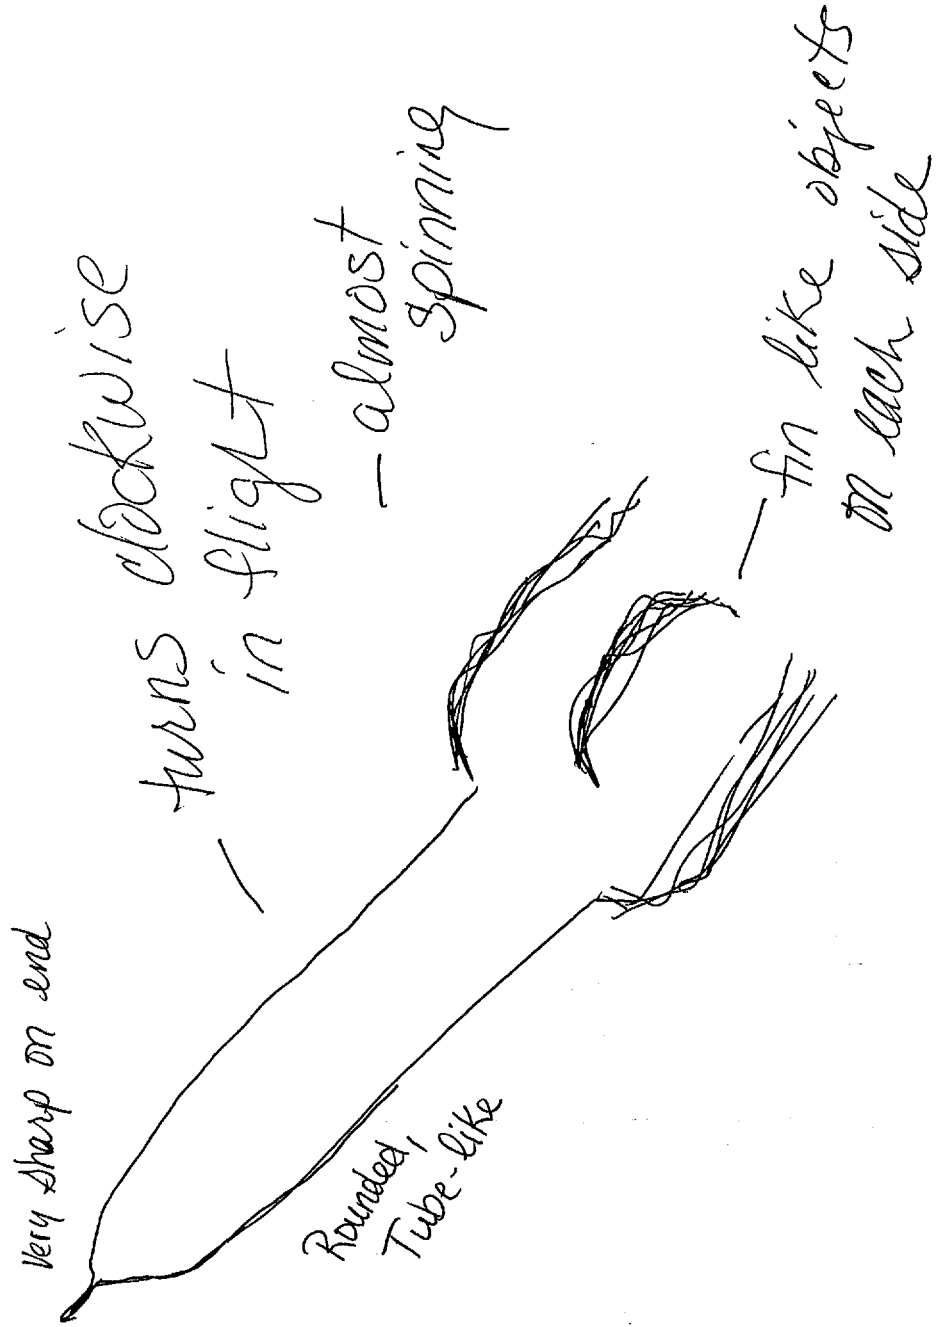

Hearing aircraft overhead, I saw people loading up a long, narrow, barrel like object and pointing it into the air, shooting at the aircraft. It ~~make~~ me think of an anti-aircraft weapon. Looking over the area, I found it to be very dry, barren, hot, and having little bumps of hills over and across the terrain. I could also see a very large hole in the ground. There is an odd shaped object that has a strange texture. It feels like curly cotton balls yet wirery. It is soft but very stubbly and nappy.
