1. (S/NF/SK) MISSIONS: The target is the vessel 

2. (S/NF/SK) VIEWER TASKING: Encrypted coordinates. After 018 had strong stage 4 contact the following cues were given "people," "why hasn't it reported in?" "is that the reason they can't report?" "is the vessel in danger?" and "is it going to its original destination?"

3. (S/NF/SK) COMMENTS: PI: Skunk smell. Summary attached.

SUMMARY OF INFORMATION

The target is a fair-sized ship in open water. It is presently located at 1530S/9030W, proceeding in a northwesterly direction at normal speed. The vessel is heading toward its original destination.

The vessel is not presently in danger. The people on board are busy and happy, except for one person who is very sick.

The vessel has not reported in because the ship's radio has a strange white "corrosion" (more like a fungus growth) inside one of its main plugs. The sick person is the one who knows enough about the equipment to find and fix the problem.
