2. (S/STD/NF) 018 reported a very vague possibility that the been (see comments, item 3, below) in the area of the Virgin Islands/British Virgin Islands at the time of the interview. The was carrying drugs, located in the rear lower portion of the ship in two "propane tank-like" metal containers. Each container was a composite of two containers, a smaller one inside the other, larger, to provide a space in between the two. It is in this space where the drugs can be found. The front "tank" contains plastic-wrapped packages of white material, and the rear "tank" may contain marijuana.

(S/STD/NF) FROJECT OFFICER'S COMMENTS: Of strong interest to this target was 018's report that the was "protected" from our specific kind of detection, and that this was done on an experimental basis by the drug smugglers because "they know about us, now". The "protection" gave 018 only minor problems with entering the ship and searching its contents, but appears to have been much more effective when 018 tried to locate the ship's geographical coordinates.
