Feedback on JT4-043 29 June 90

OOC: The vessel will be involved in a surface transfer at location 1655N 7745W. Some of the contraband may be offloaded at Jamaica.

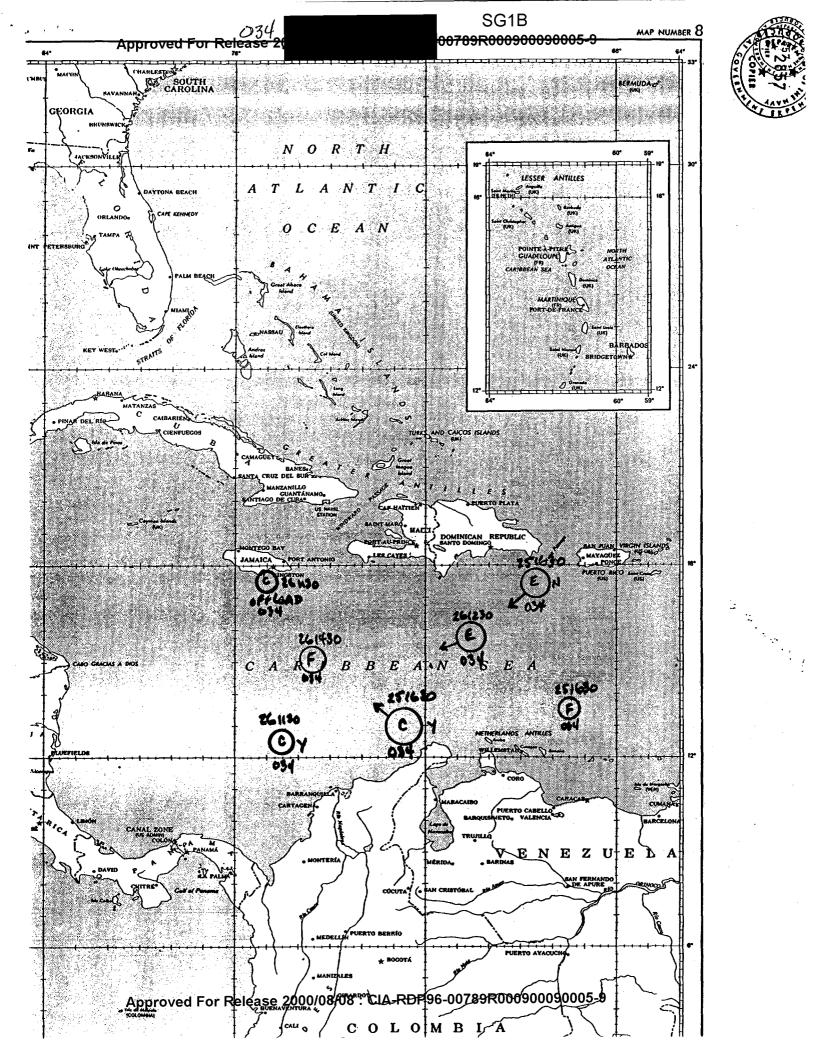

SG1B OOE: At 291430 June, **Security** is at 16N 7845W. It is heading NW but will change its heading to E or NE to reach the transfer point. A surface transfer will occur. Several vessels are involved; one is a "night trawler". One or more vessels are involved in a security role. Contraband is lowered downward. Transfer will occur at 1730N 7800W on 30 June between 2230 and 2400 hrs.

contraband has or will take within a 3-24 hour time period at 17 50 N/75 30 W. The

SG1B

OOF: 021230L Jul 90

is a sleek, well-kept vessel, mainly white in color which is reminiscent of an very, expensive yacht. Its name is in block style gold-letters in an arch across the stern. The name is 6-7 letters and appears to be "C or K ANTI_ _" /"CANTIS"/CANDICE"/". Another word begining with "MO" is written horizontally across the stern below the arch. The term "REY" or letters "R E Y" are somehow associated with the vessel or the second SG1B word. At 02 0900Z Jul 90, the and two other vessels were converging toward each SG1B other. The was in radio contact with another vessel. The characters "Y" and "7" were used during this procedure. Of the vessels converging together, one was a large commercial ship with a dark hull with light colored lettering and white superstructure. It was similar in shape to a small tanker. It had a narrow "bridge" and "pole-like" objects projecting from the deck (see sketch). The word "CANUSO"/"CANOSO"/"CANTOSA" is associated with this vessel. As the ships converged together, small, high-speed, 1-2 person boats travelled between the tanker-like vessel and the and from the tankerlike vessel to the third vessel. Movement of contraband was mainly from the tanker-like vessel to the with a lesser amount going to the third vessel.
