Summary of Information

~~There will be~~ movement of large aircraft that are old and slow and reminiscent of transports. There are a number of these taking off ~~but they feel empty~~. The ground surface is graded, rough and gravelly. There are a number of rolled-up objects and small gray tubes stacked on the ground.

~~Important~~ people are spreading out from a central area but without authority to do so. There is fear, anxiety because they are being forced to remain.

There is movement of machine parts associated with an object that is circular with spiral-like features downward. ~~Sense small~~ groups of aircraft flying north. They are low flying and drops or mist is coming from them. ~~Sense~~ that this action has to do with the Turkey/Iraq border. ~~Some~~ of the aircraft are flying into objects.

There are ~~large~~, rolling cylinders or tubes with zig-zags and ~~the~~ words (phonetically) "KAS-RA" and "IM-PLA or IM-PLD" associated with these objects.

There are numerous objects which have been buried by a wall of earth but are becoming uncovered. They stick out of the ground at an angle. ~~There is~~ a group of these objects situated

~~SECRET~~

within a large, dry and very flat area ~~east of a large city~~. The area's surface is mottled beige/white and is reminiscent of a dry lake bed or flat. The objects slant towards the west.

There is a concentration of tents which have been abandoned in such a hurry that there is no attempt to pick things up. Stacks of books and tables have been left.

There is a feeling of disbelief by high level individuals who are associated with major concentrations(?). Some are running away. Other high level people are disappearing.

There is a complete shutdown of something; either communication, command and control or control over the lower ranking individuals. The general population is being left in the "dark" by Hussein. His priorities become "his army".

The term "BASRA" is associated with a series of features which are connected by a common line. These features each have slanted sides with the central area at a different level than the surrounding surfaces. Could not ascertain if the sides slanted up or down and whether the central surface was higher or lower than the surrounding levels.

There is an increase in the number of short distance, slow air/above ground movement.

Intent is to by-pass larger centers of forces and to go after "softer" targets. SCUD missile launches will be used as a distractor. Targets are aircraft carriers first and then the hospital ships. There are suicide runs on the carriers.

~~SECRET~~/NOFORN

~~SECRET~~
Something on the outskirts of RIYADH, not within the city,
is a target.

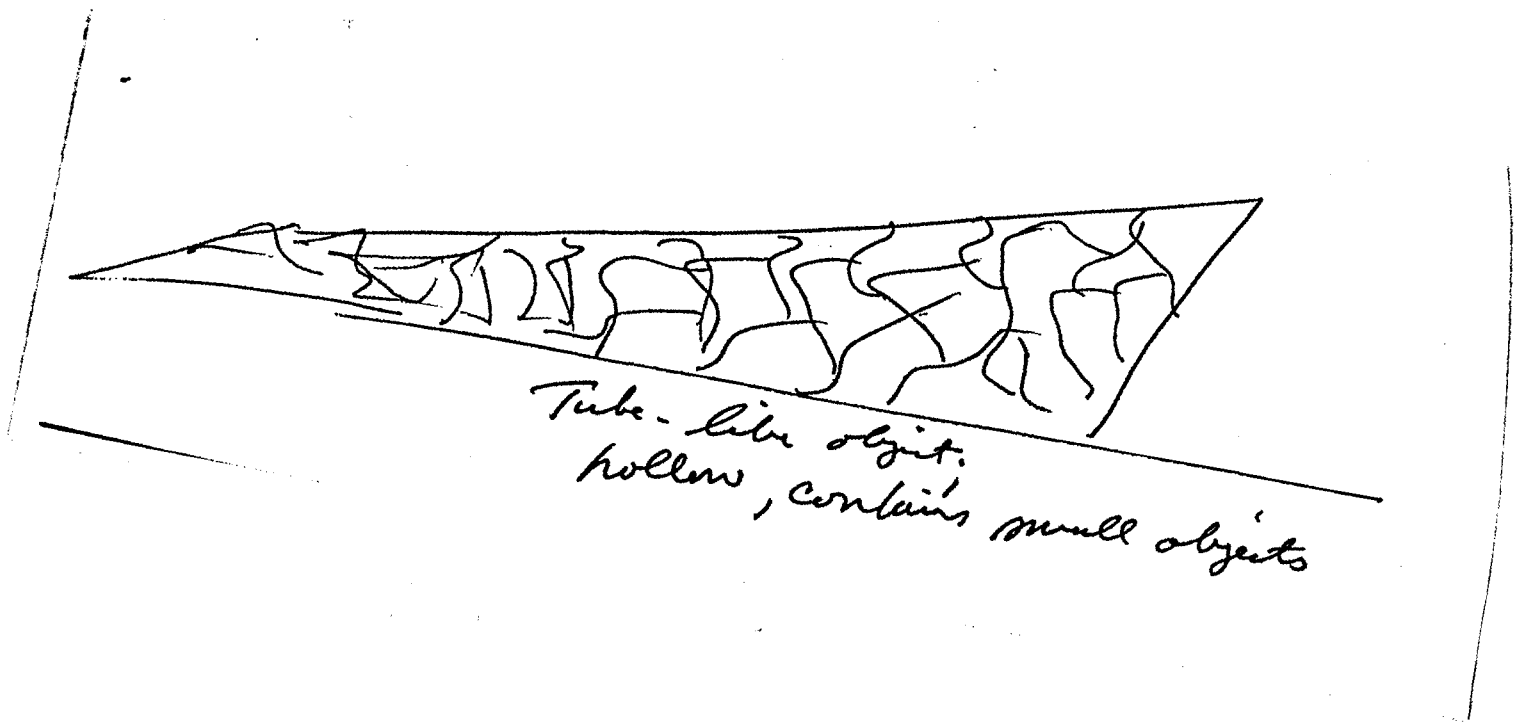

There is an attempt to capture MECCA.

Hussein's attitude is ruthless. Feels world opinion is
already shot. He is no longer worried about what the "civilized"
world says about him.

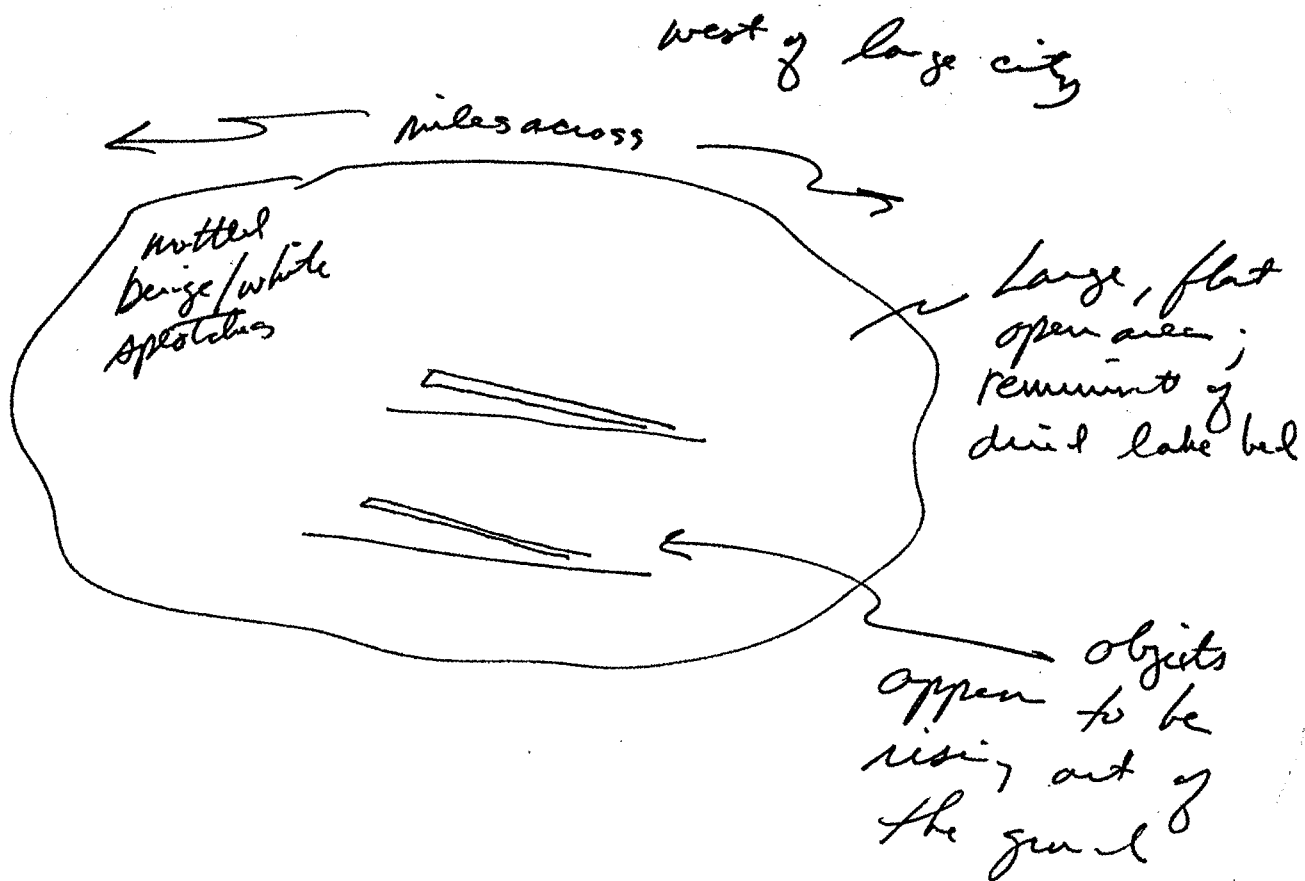

~~SECRET~~ NOFORN
