WORKING PAPER

SUMMARY OF INFORMATION:

The target is a large, wide, open area. Around this area there are different types of structures and different activities. There are some structures that are tall, narrow, with rounded things on the end of them which reminded me of lights in a large stadium. There is something pointed and something jagged. There is also a solid, concrete wall. There is one person with his back against the wall and his arms up. But there are also very many people here and much activity. The main activity seems to be a solid, curved, jagged, bright object moving upwards very fast. This object lifts off the ground into the air. When it does, it is hot, strong, bright, glowing and intense. It is possible that it creates some kind of explosion.

The purpose of this target is "to control", to have, maintain and keep strong.
