- E. SESSION SUMMARY:

General target area is a land/water interface which is (at time of session) in darkness. There are lights off in the distance which remind me of refinery lights. The area is windy and cool. The land at this particular place "juts out" into the water.

The specific area of interest is a flat, manmade "structure" which consists of two convergent flat (paved?) areas with broken yellow lines on them. The ends of the convergent areas appear to end abruptly.

Facing this area, there is a sound coming from the area directly behind you. This area is brightly lit. A male person in yellow and black clothing is there, making the noises while working on an object. The object is large and heavy and looms at an angle over the person. It is metallic and appears to be an airplane.

The person is waiting for a specific "time" to occur. This time is not expected soon, so he is busying himself with other things until the specified "time" draws near.
