PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: TNG-5263	SESSION NUMBER: 01#02
DATE OF SESSION: 07-08 FEB 89	DATE OF REPORT: 09 FEB 89
START: 07-1006/08-1000	END: 07-1101 /08-1035
METHODOLOGY: CRV	VIEWER IDENTIFIER: *032

1. (S/NF/SK) MISSION: SEE MISSION TASKER (ATTACHED)

2. (S/NF/SK) VIEWER TASKING: ACCESS AND DESCRIBE TARGET.

3. (S/NF/SK) COMMENTS: VIEWER HAD A DIFFICULT TIME WITH THIS TARGET. MOST OF THE DATA PROVIDED WAS GOOD DATA, BUT MUCH OF IT WAS NOT PERTINENT TO THE DESIRED RESPONSE. THIS WAS LARGELY DUE TO THE MONITOR, WHO LET THE VIEWER BELIEVE THAT THIS WAS AN OPERATIONAL MISSION. THE VIEWER HAD TO DEAL WITH PRECONCEIVED AOLS FROM THE START. IN SPITE OF THE AOL, THE VIEWER DID QUITE WELL AS EVIDENCED BY SIGNAL DATA CONTAINED IN SESSION.

4. (S/NF/SK) EVALUATION:

3
A

Tng ops should make no difference to the viewer. Getting past is needed!

SESSION SUMMARY

VIEWER NUMBER: 032
DATE: 7 FEB 89
START TIME: 1006L 7 FEB 89
END TIME: 1100L
RESUME TIME: 1000L 9 FEB 89
END TIME: 1050L

Site is a storage facility. The site is highly secured with guards and remote sensing devices. The buildings at the site are a mix of old and new. There is a chain link fence with razor wire at the top surrounding the complex. There are ceiling pipes, lights, large heavy doors, loading platforms and both large and small vehicles moving about in the area.

There is a series of railroad tracks in the area which support the complex itself. These tracks run into the complex, and terminate at loading and unloading docks. Some of these tracks are small gauge vice the more prevalent standard gauge tracks. Freight cars move into the complex carrying sealed metal cylinders (AOL like bombs or torpedoes) stacked inside. Sometimes these larger freight cars are unloaded and the freight is moved over the smaller gauge rail to other storage sites inside the complex.

There are hundreds of 55 gal. drums sitting inside the structure -- some are also on loading docks. Alongside these large drums are smaller ones which are ultimately placed inside the larger ones and sealed. The small drums contain white crystals with elements of black in them, others of the small drums contain what look like dark shaded or black rocks. There is a clear liquid surrounding the small drums once they are placed inside the larger ones (AOL like fuel oil). Markings on the drums indicate danger and flammable or combustible.

There are large cooling fans and ventilation ducts present in and around the buildings. There are people moving about -- some lifting, driving, taking inventory on clipboards, or monitoring information from large panels.

At present while viewing the site left me with the impression that there is something missing in the safety equation. There is a perception that unskilled personnel work here or do what is done here under the supervision of others -- but there is still something amiss!
