PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 6034                      SESSION NUMBER: 03  
DATE OF SESSION: 21 JUN 89              DATE OF REPORT: 21 JUN 89  
START: 0900                                  END: 1015  
METHODODOLOGY: ERV                      VIEWER IDENTIFIER: 032

1. (S/NF/SK) MISSION: To access and describe a structure, determine its functions and supporting activities, and, if successful attempt to located the structure from a map of the US.

2. (S/NF/SK) VIEWER TASKING: Remote Viewer 032 tasked with requirements in accordance with mission requirements. Viewer 032 tasked with accessing the energy source and describing the nature of the energy utilizing single word descriptives.

3. (S/NF/SK) COMMENTS: No inclemencies noted. A Summary of Information is attached to this report. Results of Viewer 032's first search is reflected in Para 5, below.

4. (S/NF/SK): EVALUATION: (3)

5. (S/NF/SK) SEARCH EVALUATION: (1) 032 made aware

*of several options on how to conduct a search; either directly, or from a person, place or thing.*

SUMMARY OF INFORMATION

There is a source of energy (high energy). The energy is a brilliant white which is in the form of rays -- individual cylinders of light energy which are ultimately concentrated (joined together) to form a larger rod or ray of energy.

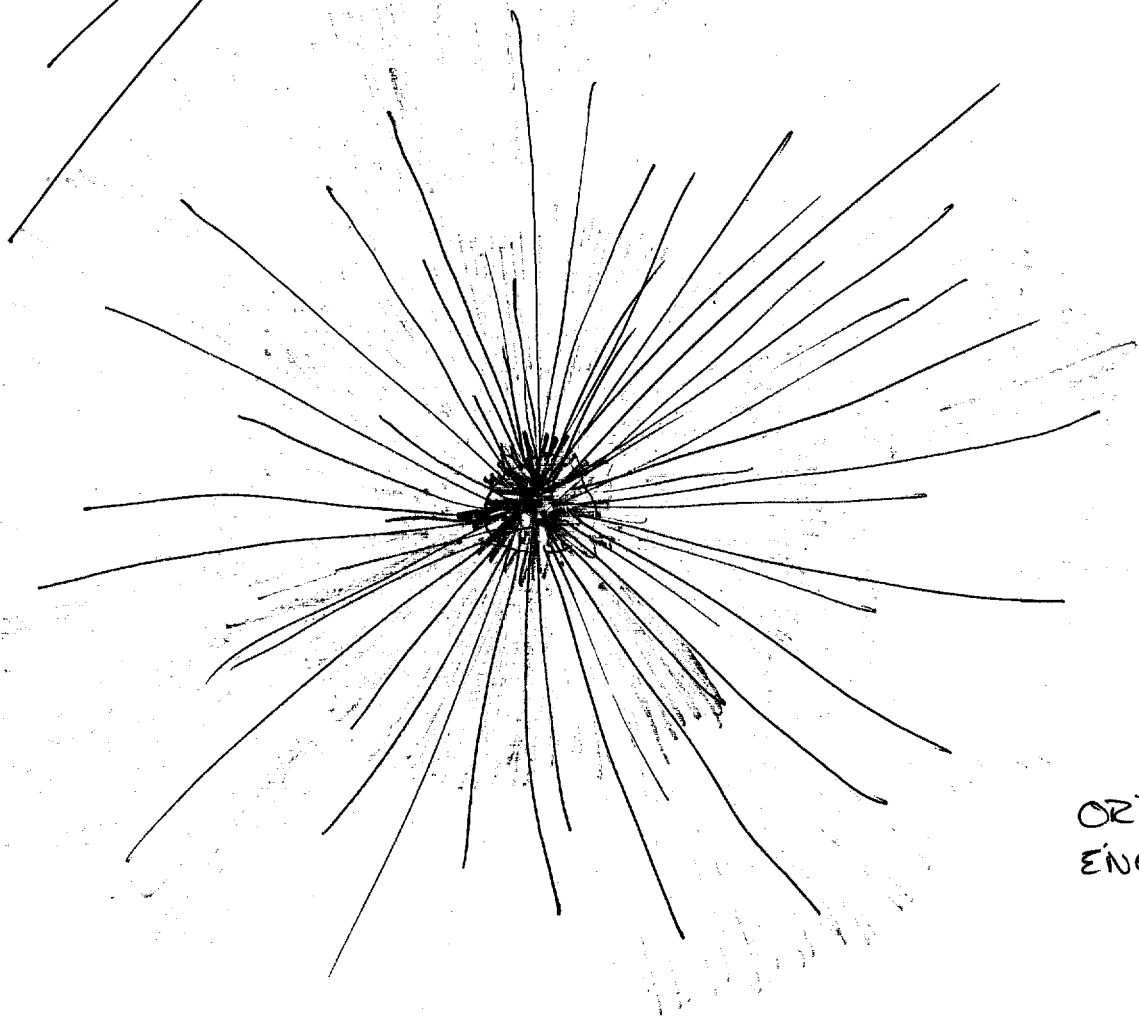

This ray is reflected, intensified, directed and thrust from some disk like structure. The surface of this disk glows hot in a honeycomb pattern -- sections of the surface pulsate alternately during the operation/presence of the energy source.

The originating source of the energy is that of mixed or opposed elements. An orb or ball is encapsulated and is intensely glowing, radiating a tremendously hot white light -- there is a fan of energy all around the orb. This energy is pressed forward from the orb in increments, stored and then released in a burst to the disk. This pressure or containment device is some kind of intensifier. It serves to build up energy intensity and heat prior to release.

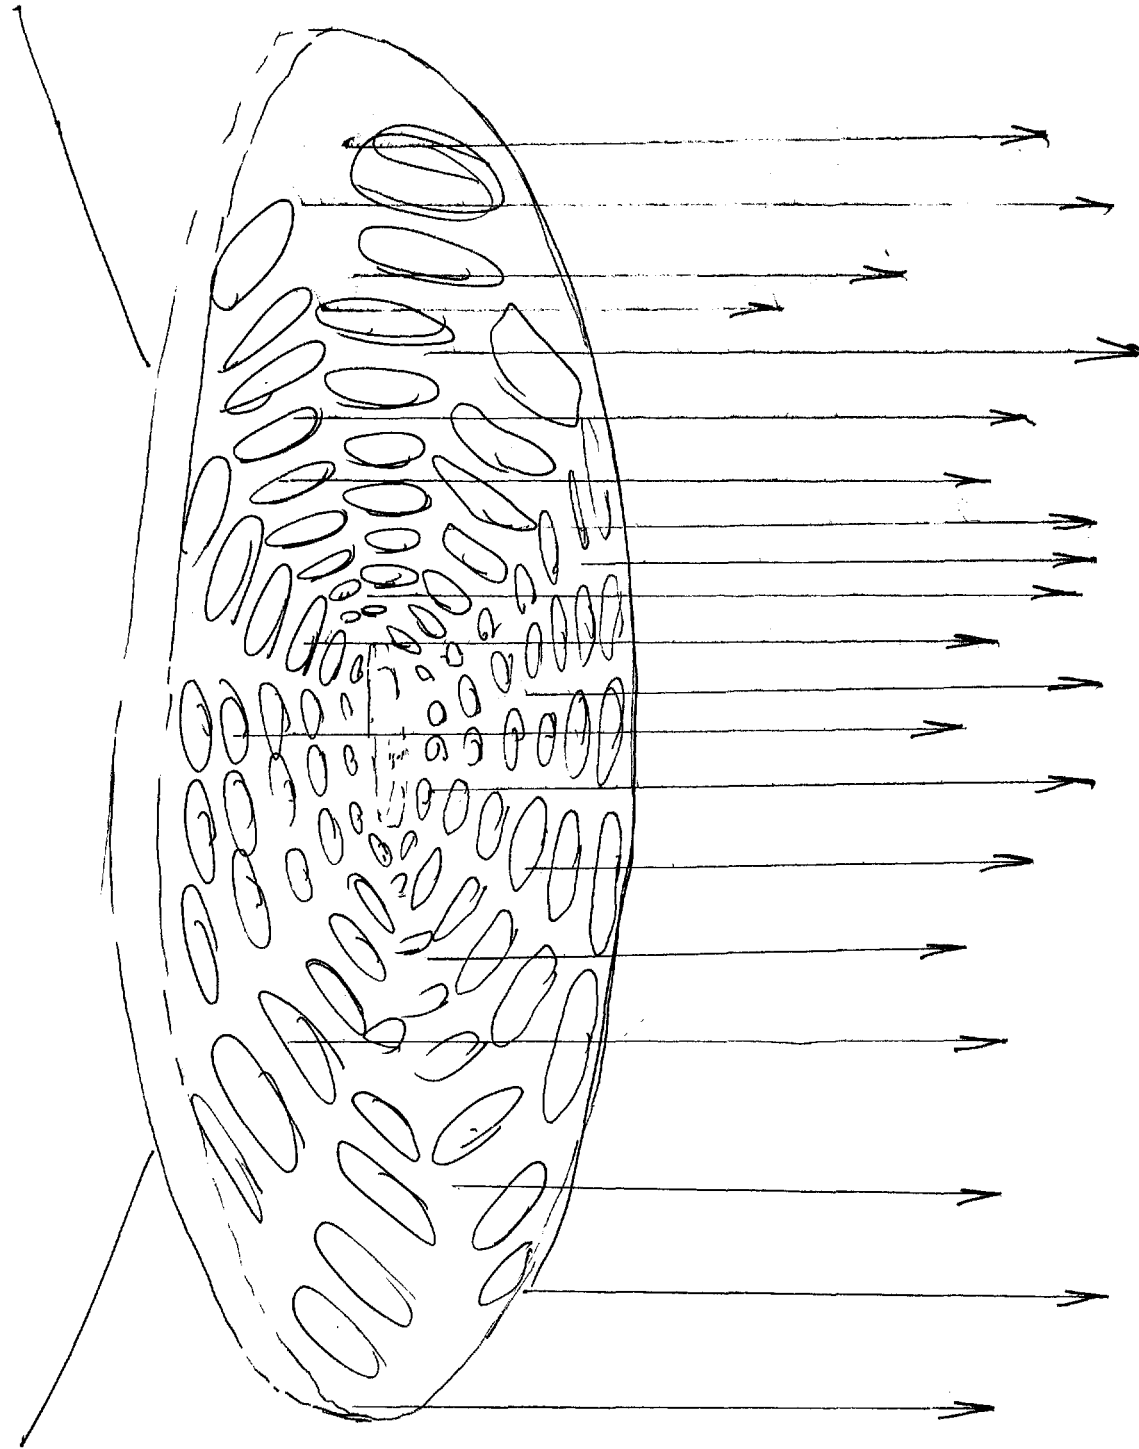

The surroundings of the site are austere, jagged, rocky, and it appears elevated from its surroundings. There is something flat and opaque nearby -- like a twilight sky only at surface level.

Rods / Filaments of  
Energy which ARE  
COMBINED

ORB of  
Energy

372932 / 640352.
