WORKING PAPER

Project: 8963  
Date: 890525  
Viewer: 018  
Session: 02

SUMMARY OF INFORMATION:

1. (S/NF/SK) The site was reaccessed, in order to gain greater detail. The physical site was given Stage III attention (see sketches, pages 3 & 5). The site is a large complex of buildings.
2. (S/NF/SK) Specific attention was given to finding the key function of the site. The principal function of this set of structures is the manufacture of goods which are in the form of a dry, white powder.
3. (S/NF/SK) Map dowsing, using the wall map, gave a U/I feeling to the east of the Salt Lake area, then a "cold spot" just south of Jacksonville, FLA, then a less well defined "cold spot" around the entire Boston area. I had a recurring impression of the site being located in the northeastern U.S., so made the analytical decision to choose the Boston area as the site's location.
