WORKING PAPER

Project: 6038
Date: 900117
Time: 1319-1339
Viewer: 018
Session: 01

SUMMARY OF INFORMATION:

1. (S/NF/SK) Describe the target: The general area of the target is a land/water/city interface. The area, at the time of viewing, was cold and humid. The time there appeared to be either daybreak or dusk. It had the ambience of "North Sea", or northern latitude.

The city is built around a curve in the edge of the body of water. The city is of a very good size, but did not strike me as being "crowded".

There are many tall buildings.

The target, itself, appeared to be a person, but I concentrated for the present time on the person's location. The specific location is high in one of the tall buildings. It has all the trappings of a business office, but, from this person's point of view, serves more as a "personal base of operations", with a slight hint of "governmental" purpose. It is sparsely decorated, but with very expensive furnishings. The body of water can easily be seen from the windows.
