WORKING PAPER

Project: 5289
Date: 900124
Time: 1241-1430
Viewer: 018
Session: ~~02~~ 01

SUMMARY OF INFORMATION:

1. (S/NF/SK) Describe the target object: The object appeared to be rounded, with a covering outer surface which stands somewhat away from the contents inside. The outer surface of this covering was smooth, with a bumpy texture. The covering appeared to be made of a translucent light green material with a small honeycomb pattern in it, which was apparently "colored" a dark color on the outside. It felt and sounded (when thumped) like fiberglass construction.
2. (S/NF/SK) The session ended due to illness, without addressing the object further, and without addressing the other EEI. These other EEI will be taken up in a subsequent session.
