PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: *8804* SESSION NUMBER: 1 through 4

DATE OF SESSION: 19-22 Sep 88 DATE OF REPORT: 26 Sep 88

START: See individual sessions

METHODOLOGY: CRV VIEWER IDENTIFICATION: 025

SG1A

- 1. (S/NF/SK) MISSION: To access and describe [REDACTED]
- 2. (S/NF/SK) VIEWER TASKING: 6-digit encrypted coordinates: .557803/870630

3. (S/NF/SK) COMMENTS:

SG1A

4. (S/NF/SK) EVALUATION (2) ↓

a. Goal: The principle function of [REDACTED] is to complete or finalize a government project involving human resources. A small group of people are a think tank working directly on or with other people (cases) under experimental conditions. It is a type of laboratory.

b. Content: The building is made out of natural materials and has windows (page 10 of 19 Sep). The building is not new but is kept very clean. The walls have metal inlay and there is a space between the inside and the outside. The project area seems to be sectioned off from the rest of the building. Security is important. On the inside, there are long wide corridors with polished off-white linoleum floors and long double rounded fluorescent lights. Also, there are narrow cheap doorways with rooms. To the left in a long corridor, there is a room with a large window on the far wall and a bed which has mussed cheap linens on it (pages 1 and 2 of 20 Sep). The rooms are far and few in between. Further down the hall on the right, there is another room with large mechanical generating machinery. There are physical monitoring devices which are utilized for the biological system. Something is hooked up on a machine that has red round finger buttons that are pushed (see sketch on page 7 of 21 Sep). A cinder block wall is at the end of a long hall. In another room, there is a small library of old books. There are plain brown wood shelves along the walls extending from the floor to the ceiling on basic theory and technique (Sciences). A few books are historical and some are military related. This rudimentary library has predominantly outdated basic instruction experimental procedures books with simple diagrams.

Overhead sketches: The overall design and floor plan sketches are of pages 5 and 6 of the last session. This building is next to another building and a parking lot. Looking out of a large window in the room with the bed, there are green hills and a narrow street at least four floors down. An entrance way to the building is on the left (on page 8 of this final session).

f. Conceptual sketches: Think tank (on page 1 of the 21 sep session).

g. Other: Original Transcript.
